# How Much Do You Use?

According to the US Geological Survey, the Average American uses 80 – 100 gallons of water per day. Assuming the water drop below represents 100 gallons of water, divide the drop according to the number of gallons of water used on the activities below each day. When you finish, compare your estimate to the numbers provided. How close were your estimates?

## Daily Activities

Brushing Teeth  
Taking A Shower  
Washing Dishes  
Hand Washing  
Drinking  
Laundry  
Toilet
