

10-year FY24 to FY33 Proposed CIP Budget
Environmental Quality & Operations Committee
January 18, 2024

David Parker, Vice President, Engineering
Matthew Brown, Chief Financial Officer and EVP Finance, Procurement
and Compliance

Budget & Rates Adoption Calendar

Timeline	Activity	Status
January 4	Budget Workshop with Board of Directors	✓
January 12	Wholesale Customer Briefing	✓
January 19	Office of People's Counsel Briefing	
	Committee Discussions & Reviews	
January 18	Environmental Quality & Operations	
January 23	Joint DC Retail Water & Sewer Rates and Finance & Budget Committee	
February 1	Board Meeting (No Board Action Required)	
	Committee Reviews, Recommendations & Actions	
February 15	Environmental Quality & Operations	
February 22	Finance & Budget	
February 27	DC Retail Water & Sewer Rates	
March 7	Board Adoption of Budgets	
April	Submit Budget via the District to U.S. Congress	
April – June	Rates Public Outreach & Town Halls & Public Hearing	
July 3	Board Adoption of Rates	
October 1	Fiscal Year 2025 Begins	

Proposed FY 2025 Budget

Proposed \$788.2 million FY 2025 Operating Budget, increase of \$50.7 million

Operations and Maintenance (O&M) Budget	Non-O&M Budget	PILOT and ROW
\$454.5 million	Debt Service - \$249.5 million Cash Financed Capital Improvements - \$60.4 million	\$23.8 million
<ul style="list-style-type: none"> Personnel and non-personnel costs 	<ul style="list-style-type: none"> Support the capital program 	<ul style="list-style-type: none"> Payments to the District

Proposed \$7.74 billion 10-year Capital Budget, increase of \$792 million

Capital Projects	Capital Equipment	Washington Aqueduct
\$7.04 billion	\$347.4 million	\$357.5 million
<ul style="list-style-type: none"> Clean Rivers Lead Free DC Equipment upgrades and rehabilitation at Blue Plains Investments in the aging water and sewer infrastructure 	<ul style="list-style-type: none"> Pumps, motors, and meter equipment Backhoes, jet-vacs, catch basin trucks, other aged vehicles to meet operational needs Information technology projects 	<ul style="list-style-type: none"> Improvements at the Washington Aqueduct

Multi-Year Rate Proposal for FY 2025 and FY 2026

- Proposed rate changes:
 - Water and sewer rates increase by 8.0% for FY 2025 and 6.0% for FY 2026
 - Proposed CRIAC of \$21.23 per ERU in FY 2025 and \$24.23 per ERU in FY 2026
 - Right-of-Way Fee at \$0.19 per Ccf for FY 2025 and \$0.20 per Ccf for FY 2026
 - PILOT Fee at \$0.61 per Ccf for FY 2025 and \$0.62 per Ccf for FY 2026
- Rates and charges that remain the same:
 - Customer Metering Fee remains at \$7.75 for 5/8" meters
 - Water System Replacement Fee (WSRF) at \$6.30 for 5/8" meters
 - Proposed Groundwater Rate of **\$3.50** for FY 2025 and **\$3.76** for FY 2026
 - Proposed High Flow Filter Backwash Sewer Rate of **\$3.32** for FY 2025 and **\$3.54** for FY 2026

- Cost of Service Study aligned with rate proposal
- Combined rate increases lower than last year's forecast

Change in Average Household Charge	Fiscal Year	
	2025	2026
Recommendation	4.8%	6.5%
Previous Forecast	7.0%	6.8%

Reflects updated changes based on cost of service study completed

Multiple Capital Budget Scenarios Considered

- Budget Process includes consideration, evaluation, and prioritization of various CIP scenarios including related rate and revenue impacts
- Proposed CIP of \$7.7 billion
 - Funds two major ongoing “once in a generation” projects
 - Strikes a balance between necessary rate increases and critical capital investments

CIP Scenario	Description
Proposed	Funds increases for the Potomac River Tunnel; advances Lead Free DC program; ramps up to 1.5% annual replacement rates for small diameter water mains and 1.0% for sewer rehabilitation; includes upgrades at Blue Plains, Non-Process Facilities and Washington Aqueduct etc.
Additional Investment	Would add additional investments at Blue Plains and ramp up to 2.0% annual replacement rates for small diameter water mains and 1.3% for sewer rehabilitation
Full Asset Management	Would ramp up to 2.5% annual replacement rates for small diameter water mains and 1.5% for sewer rehabilitation; funds projects at Blue Plains including implementation of innovative treatment processes and renewable energy projects

Capital Budget Scenarios

- The primary source of funding is Retail Rates and Wholesale Customer participation
- Growing the capital plan would increase customer rates higher than the Proposed CIP

Projected FY 2024 – 2033	Proposed	Additional Investment	Full Asset Management
Size of Capital Plan	\$7.7 billion	\$8.3 billion	\$9.1 billion
Wholesale Contributions	\$1.3 billion	\$1.4 billion	\$1.4 billion
New debt anticipated to be issued	\$3.3 billion	\$3.6 billion	\$3.8 billion
FY 2033 Debt Service Costs	\$462.9 million	\$484.5 million	\$504.4 million
Average Rate Growth for Average Household	6.3%	6.8%	7.4%
FY 2033 Average Household Charge	\$229.50	\$241.52	\$253.26
Average Annual Bill Increase	\$10.43	\$11.64	\$12.81
10-year Cumulative Water Rate Increase	75.75%	82.75%	89.75%

Reflects updated changes based on cost of service study completed

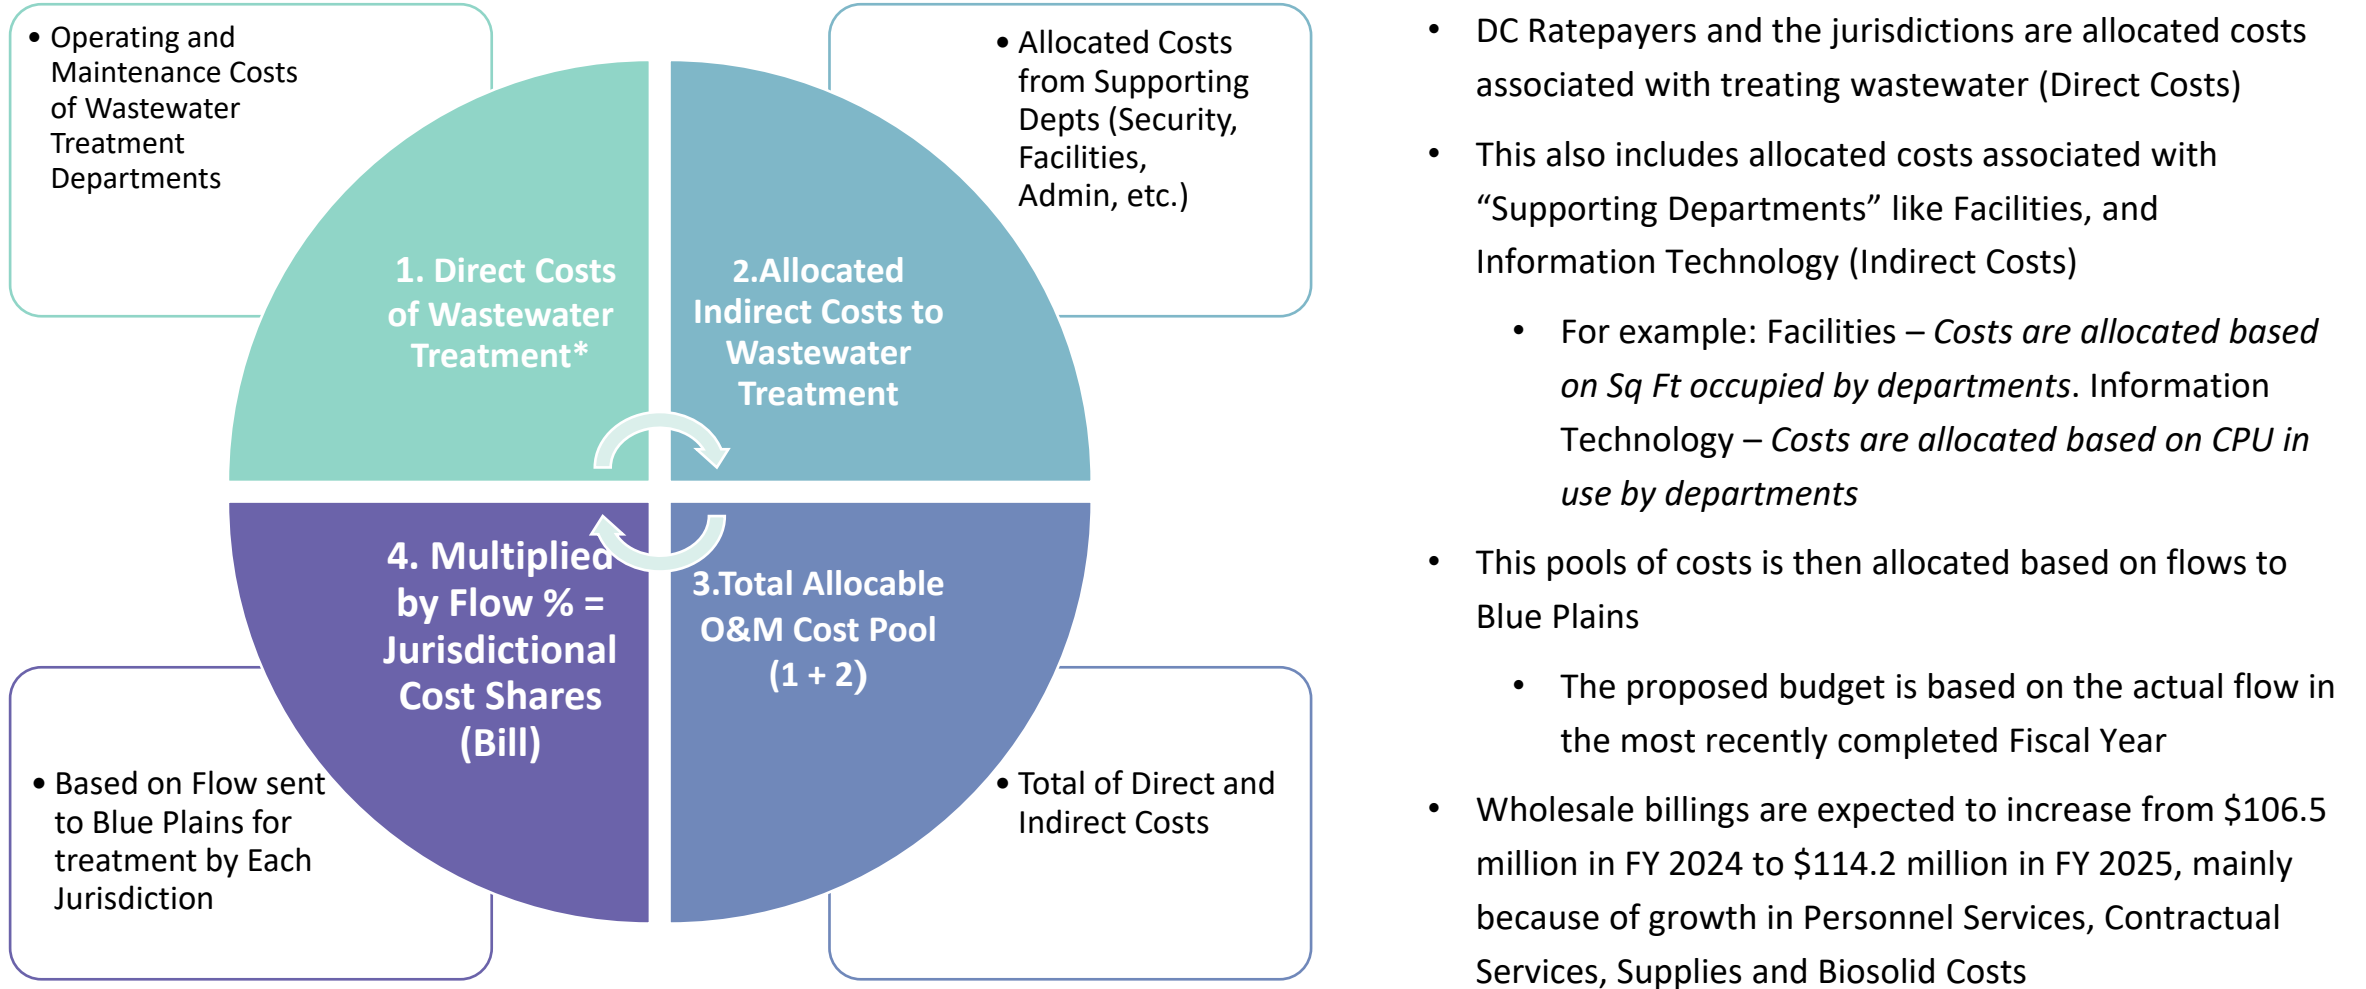

BLUE PLAINS INTERMUNICIPAL AGREEMENT of 2012

[Effective: 4/3/13]

Among the
District of Columbia
District of Columbia Water and Sewer Authority
Fairfax County, Virginia
Montgomery County, Maryland
Prince George's County, Maryland
Washington Suburban Sanitary Commission

- Both DC Ratepayers and Wholesale Customers are responsible for the costs of joint-use capital projects and operation and maintenance costs of wastewater treatment and multi-jurisdictional user facilities
- The Board-approved operating budget and the CIP are the basis for Annual Estimate Bills for both Operating & Maintenance and Capital
- The Intermunicipal Agreement (IMA) stipulates the basis of the cost allocation for the jurisdictional customers
 - Operating – based on actual flows and adjustments made for user fees and biosolids hauled by Washington Suburban Sanitary Commission (WSSC)
 - Capital - Jurisdictional cost shares for Capital Projects are based on capacity allocation or specially negotiated cost shares with IMA Partners through Council of Government Technical Committees
- Capital Bills are true-up every Quarter based on actual invoices paid during the period. WSSC audits the quarterly bills on behalf of wholesale customers.
- Operating settlement (true-up) is completed within 90 days of the completion of audit of financial statements. WSSC further audits the operating settlement bills on behalf of wholesale customers

- DC Ratepayers and the jurisdictions are allocated costs associated with treating wastewater (Direct Costs)
- This also includes allocated costs associated with “Supporting Departments” like Facilities, and Information Technology (Indirect Costs)
 - For example: Facilities – *Costs are allocated based on Sq Ft occupied by departments.* Information Technology – *Costs are allocated based on CPU in use by departments*
- This pools of costs is then allocated based on flows to Blue Plains
 - The proposed budget is based on the actual flow in the most recently completed Fiscal Year
- Wholesale billings are expected to increase from \$106.5 million in FY 2024 to \$114.2 million in FY 2025, mainly because of growth in Personnel Services, Contractual Services, Supplies and Biosolid Costs

*Wastewater treatment operations, maintenance, process engineering, wastewater engineering, resource recovery, and clean water technology - are departments related to Blue Plains and considered direct costs from cost recovery/billing purposes.

Blue Plains Operating & Maintenance Cost Shares - Billing Cycle

- The billing cycle is a year-round one
- Jurisdictions are billed according to the budget
- Bills for the first quarter will be provided in October and are due mid-November; second, third, and fourth quarter bills are sent on January, April and July
- DC Water performs a mid-year review after the second quarter-end to determine additional billing or refund needed
- After the fiscal year end, the true-up (settlement) process is completed which may result in additional billing or refund
- WSSC audits the settlement bills which may result in additional billing or refund

Blue Plains Operating & Maintenance Cost Shares

- Direct Costs** - The cost for operating and maintaining Blue Plains Advance Wastewater Treatment Plant includes personnel, chemicals, contractual services, utilities & rent, among others; these costs are considered direct cost for the Plant
- Indirect Costs** - Costs from supporting departments (e.g. Administration, Security, Facilities, Information Technology, etc.) are allocated to the Wastewater Treatment Plant
- The total of direct and indirect costs is then multiplied by the flow to arrive at the estimated billing for jurisdictions

- Below is the summary of estimated wholesale revenue from operations and maintenance billing to our wholesale customers for fiscal year 2024 and 2025

Cost Pool for Jurisdictional Shares Blue Plains		FY25 Budgeted (In'000)	FY24 Budgeted (In'000)	Change	Change %
Operating & Maintenance Costs for Blue Plains* (Budget)		\$149,103	\$137,773	\$11,330	8.2%
Estimated Indirect Cost Allocation for Support Services		\$29,821	\$27,555	\$2,266	8.2%
Total Allocable/Billable Cost Pool		\$178,923	\$165,328	\$13,596	8.2%
Estimated Jurisdictional Cost Shares (Based on Flow)	FY23 Flow %	FY25 Revenue Estimate	FY24 Revenue Estimate	Change	Change %
District	43.27%	\$77,425	\$71,223	\$6,201	8.7%
WSSC	41.18%	73,673	69,272	\$4,401	6.4%
Fairfax	10.02%	17,927	15,871	\$2,056	13.0%
Loudoun	4.81%	8,608	7,787	\$821	10.5%
Potomac Interceptor	0.72%	1,291	1,174	\$117	10.0%
Total	100.00%	\$178,923	\$165,328	\$13,596	8.2%
Wholesale Revenue from Blue Plains Operating & Maintenance Costs		102,899	95,582	7,317	7.7%
Wholesale Revenue from Multi-Jurisdictional User Facilities		7,802	7,391	411	5.6%
Potomac Interceptor Revenue		3,547	3,547	-	0.0%
Total Estimated Wholesale Revenue		\$114,248	\$106,519	\$7,728	7.3%

*Departments at Blue Plains include Wastewater Treatment Operations, Maintenance Services, Process Engineering, Resource Recovery, Wastewater Engineering and Clean Water & Technology.

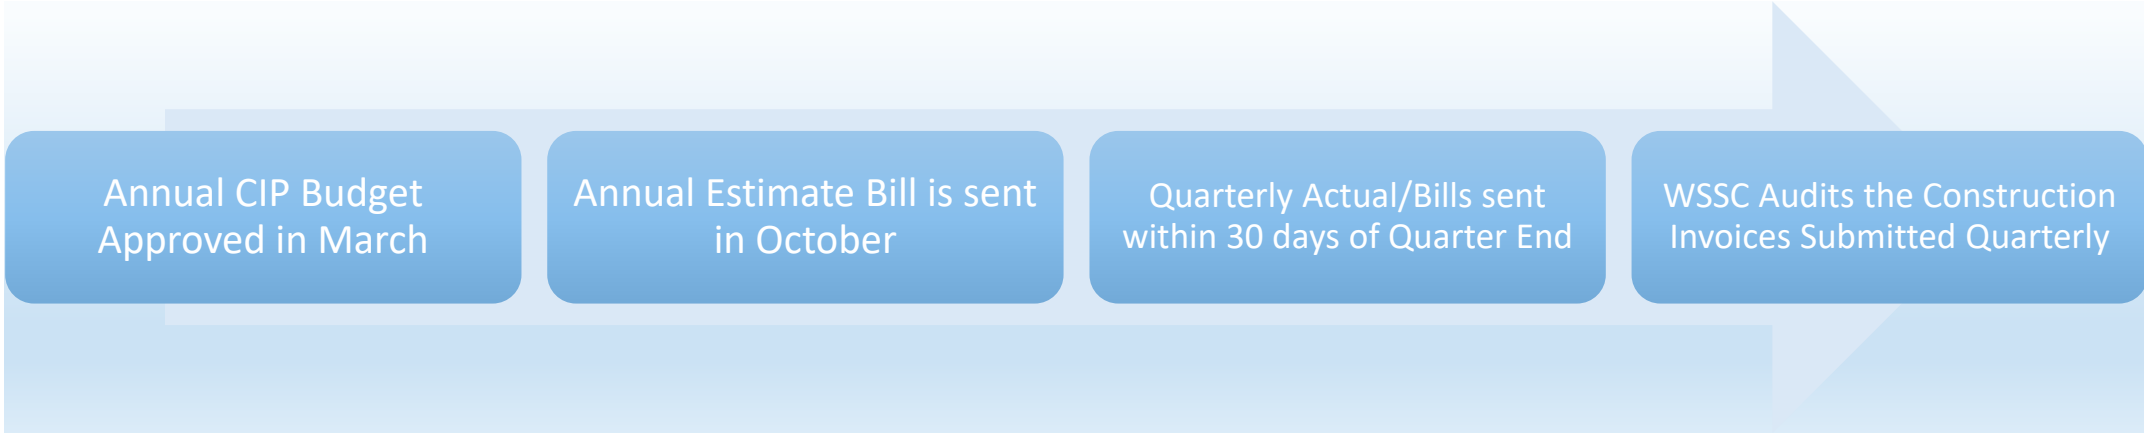

Overview of Wholesale Customer Capital Cost Shares

- Capital cost shares for joint use projects are based on capacity allocation or the specially negotiated cost % with Intermunicipal Agreement (IMA) Partners through Council of Government Technical Committees
- Unique codes are used to allocate costs to Jurisdictions correctly. See some cost code examples below:

Work Type	Description	DCW	WSSC	FAIRFAX	LOUDOUN	PI	OTHERS	TOTAL
GIBP	Blue Plains Joint Projects	41.22	45.84	8.38	3.72	0.84	-	100.00
LTCP	Long Term Control Plan	92.90	5.54	1.01	0.45	0.10	-	100.00
MJ73	Anacostia Main Interceptor (AMI)	83.97	16.03	-	-	-	-	100.00
CAPM	Capital Money (100% DC)	100.00	-	-	-	-	-	100.00

- The process starts in March with Budget Approval and concludes with the Audit:

DC Water Budget Overview

FY2024-2033 Proposed Capital Investments of \$7.7 billion

\$1.17 billion

Fully funds DC Clean Rivers projects to meet Consent Decree requirements

\$347 million

Invests in process equipment, specialized vehicles, and information technology infrastructure

Invests in the Aqueduct's capital infrastructure

\$357 million

Continues investment in Water & Sewer infrastructure

\$732M

To continue lead service line replacements

\$1.62 billion

Ramps up to 1.5% replacement for small diameter water mains per year

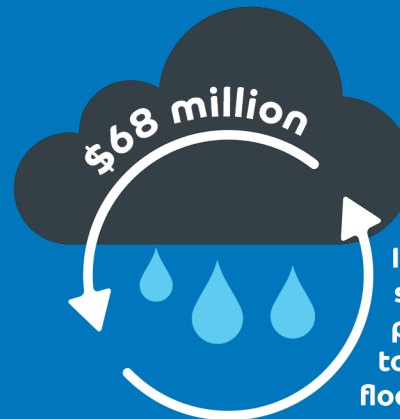

\$1.92 billion

Ramps up to 1% rehabilitation for small/local sewer lines per year

\$197 million

Renovates Non-Process Facilities including the Historic Main Pump Station, Bryant Street Pump Station, non-process buildings at Blue Plains, laboratory upgrades, and solar installations

\$68 million

Improves stormwater pump stations to relieve local flooding

\$1.33 billion

Funds rehabilitation and upgrades at Blue Plains

The 10-Year \$7.74B Capital Program, with projected rate increases:

- Fully funds the Clean Rivers Program including completion of the Potomac River tunnel to meet the consent decree requirement by 2030
- Allocates funding for the Lead-Free DC program
- Funds more than 150 miles of small diameter water main replacement
- Invests \$3.5B in the aging water and sewer system infrastructure
- Directs \$1.3B for major rehabilitation and upgrades at Blue Plains
- Allocates \$357.5M for DC Water's share of the Aqueduct's infrastructure program
- Provides \$347.4M for the purchase/replacement of vehicles, heavy-duty equipment, mechanical equipment, operational facilities, meters, office renovations, and IT projects

Proposed Changes to 10-year CIP by Service Area

Increases

Service Area	Increase	10-yr Total
Non-Process	\$56M	\$197M
Wastewater	\$152M	\$1.3B
DCCR	\$207M	\$1.2B
Sewer & CSS	\$19M	\$1.9B
Water (excluding LFDC)	\$221M	\$1.6B
LFDC	\$120M	\$732M

**Approved 10-yr FY 2023-2032 vs
Proposed 10-yr FY 2024-2033**

**Overall 12% increase across the
10-year window**

Decreases

Service Area	Decrease	10-yr Total
Stormwater	\$4M	\$69M

The Capital Improvement Program

- The **proposed ten-year CIP budget of \$7.74B** includes annual spending estimates for capital construction, capital equipment and DC Water’s share of the Aqueduct’s capital projects
 - This is a \$792M increase over the Board-approved CIP for the ten-year period
- The **proposed lifetime budget is \$16.1B** and covers total commitments, including labor, for active projects prior to, during, and beyond the ten-year window

Cash Disbursements (\$ in thousands)

	FY 2024 - FY 2033 Disbursement Plan											Lifetime
	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028	FY 2029	FY 2030	FY 2031	FY 2032	FY 2033	10-yr Total	Budget

New Combined Water & Wastewater Lab:

\$48.7M, replace existing, aging labs at Ft Reno and Blue Plains & provide state-of-the-art showcase

Electric Vehicle Infrastructure:

\$1.4M, add needed infrastructure to support DC Water's electric fleet

New Operations Training Center:

\$9M, provide vital in-house training venue, support safe operations & maintenance

Wastewater Blue Plains (\$1.33B)

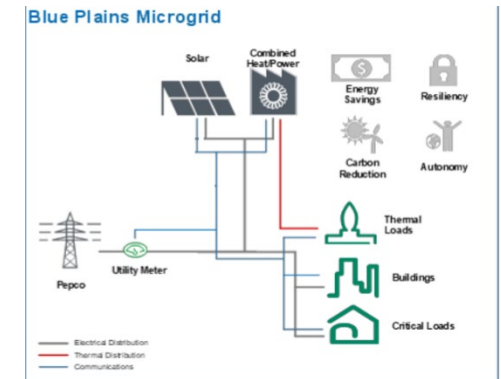

Overall Increase - \$153M

Liquid Processing - \$744M

384 MGD Average; 780 MGD Peak

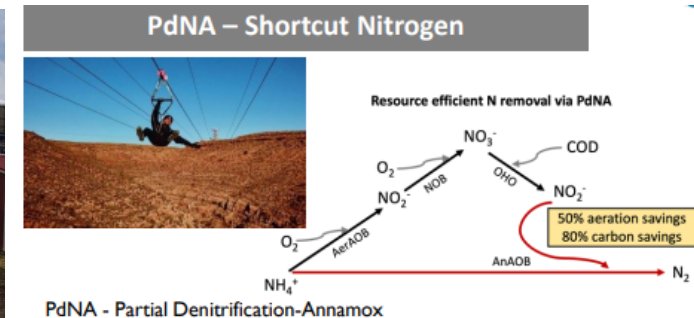

Plantwide - \$292M

Solids Processing - \$246M

Enhanced Nitrogen Removal Facilities - \$52M

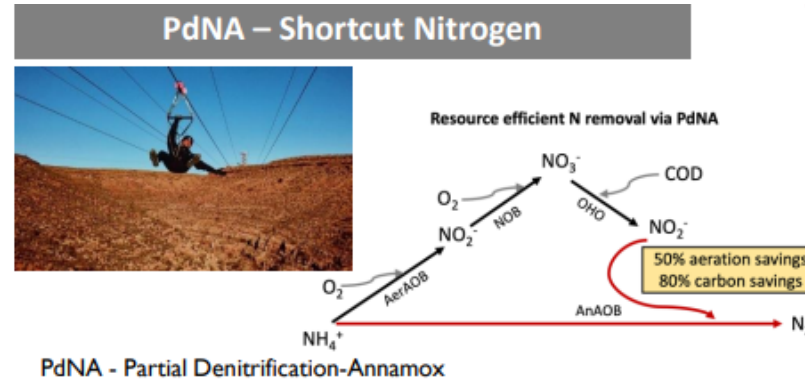

Blue Plains Major Projects – Investments for Reliability

- Asset management best practices
- Project prioritization based on risk ranking
- Rehabilitation and replacement of aging infrastructure
- Data driven decision making

36 Projects Underway this Fiscal Year, 12 in Planning, 11 in Design and 13 in Construction

Process Intensification – Secondary and Nitrification

- Innovative research to meet nitrogen discharge permit limit with future load
- Reduced dependence on methanol
- Design complete for PdNA full scale pilot

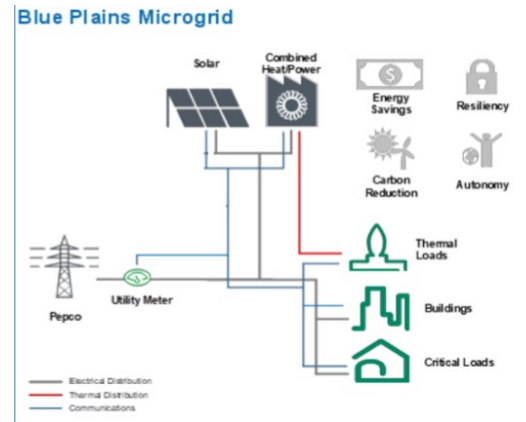

Biosolids Curing Pad & Solar Project

- Biosolids Curing Pad to produce cured product and diversify product market.
- Solar Panels to be installed on roof of Curing Pad

Microgrid Study Project

- Microgrid roadmap study is ongoing
- Roadmap addresses electrical system reliability and resiliency improvements
- Received battery energy storage system (BESS) and potential funding recommendation reports
- Roadmap is expected to be completed by May 2024

Project Name	10-yr Total
Headworks Electrical Upgrades	\$54M
Headworks Influent and Effluent Structures Rehabilitation	\$17M
Primary Treatment - 20 year Rebuild	\$127M
Effluent Filter Upgrade	\$117M
20 yr Influent Screens Building Upgrade	\$61M
Secondary East and West - 20 year rebuild	\$77M
Long-term Concrete Rehabilitation Projects	\$59M
Control Systems Replacement	\$33M
Electrical Power System Upgrades and Microgrid Studies	\$53M
Biosolids Rehabilitation	\$71M
DAF Facility 20yr Upgrade	\$49M
Secondary Treatment Upgrades for TN	\$48M

Headworks Electrical Upgrades

- FY 2024 – FY 2026 Planned Disbursements - \$11.9M
- Total Estimated Project Cost - \$70M

Construction of Flood Seawall Segments A, B & D

- FY 2024 – FY 2026 Planned Disbursements - \$20.2M
- Total Estimated Project Cost - \$32M

High and Low Pressure Reclaimed Final Effluent Pumping System Upgrade

- FY 2024 – FY 2026 Planned Disbursements - \$7.9M
- Total Estimated Project Cost - \$23M

Combined Sewer System (CSS) \$60M

- Inflatable Dams at CSS Outfalls.
- Tide Gates rehabilitations.
- Main and O street Pump Station long term upgrades.
- Maintain compliance with consent decree for firm capacity at CSS pump stations
- Address reliability and resiliency for climate change and flood hazards

16 Stormwater Pumping Facilities \$45M

- 8 Projects under design or construction to upgrade: Pumps, Electrical, HVAC and code compliance, SCADA, Safety and security.
- 4 projects are partially funded by FEMA grants.

Overall increase - \$207M

- Reflects Potomac Tunnel Contract awarded in November 2023
- Market conditions have resulted in significantly higher bid proposals/construction costs for Potomac Tunnel since 2020/2021

Remaining 10-year Budget

- Anacostia LTCP Projects (\$30.8M)
- Potomac LTCP Projects (\$995.6M)
- Rock Creek LTCP Projects (\$143.4M)

Projects in Construction:

Div PRT-B, Potomac River Tunnel (NTP 11/9/2023)

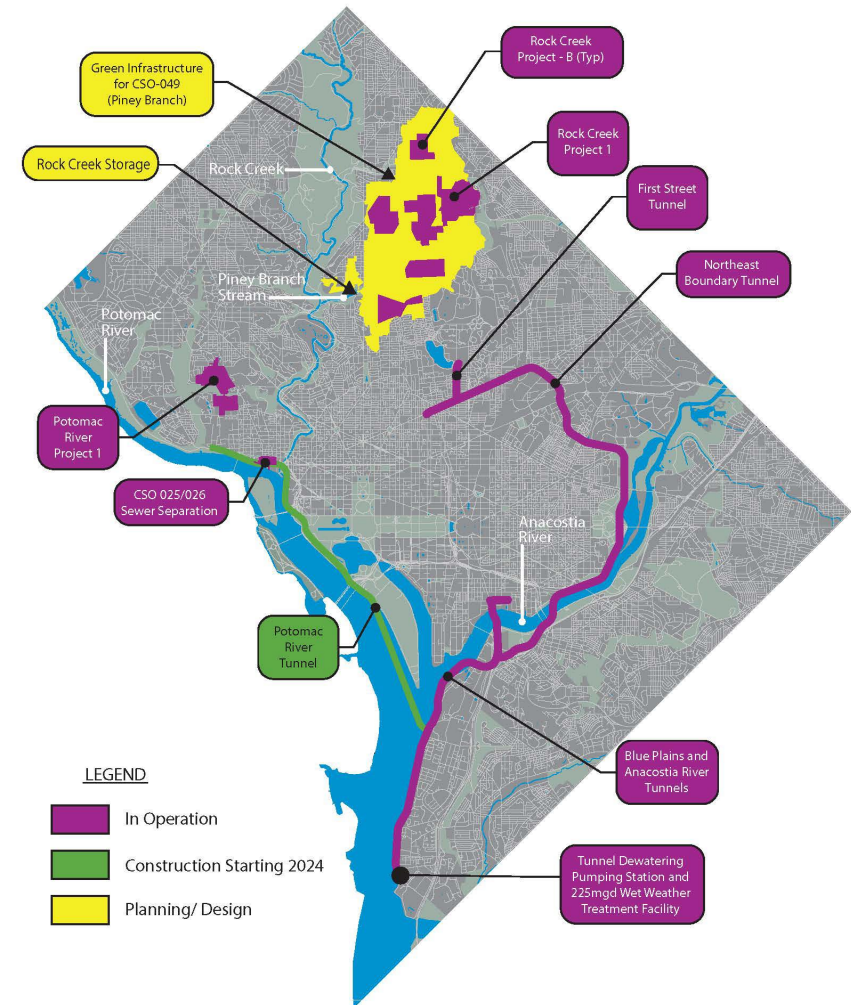

Div J, Northeast Boundary Tunnel (Site Restoration)

Upcoming Projects:

Div RC-C, Green Infrastructure (Procurement 2024)

Div RC-T, Piney Branch Tunnel (Procurement 2025)

Div RC-D, Green Infrastructure (Procurement 2027)

Goal: Achieve a balance between asset age and remaining useful life

- Higher replacement rate needed to address historical under investment
- Target value: median remaining service life is 40-60% of expected service life

Replacement or Rehab Rate (Full Replacement/Rehab Duration)	Target Value reached in Year ...	
	Water	Sewer
1% (100 years)	2113	2117*
1.5% (67 Years)	2066*	2073
2.5% (40 Years)	2042	2046

* Proposed budget includes ramping up to 1.5% and 1% per year, respectively, for small diameter water main and small local sewers

Age (years)	Water	Sewer
Median age	79	89
Expected service life	115	110

Overall Increase - \$59M

Sewer Collection System - \$593M

Interceptor/Trunk Force Sewers - \$853M

Sewer Ongoing - \$207M

Sewer Pumping - \$153M

Sanitary Sewer System— investment for reliability

Risk based prioritization incorporating equity considerations

Inspections Performed:

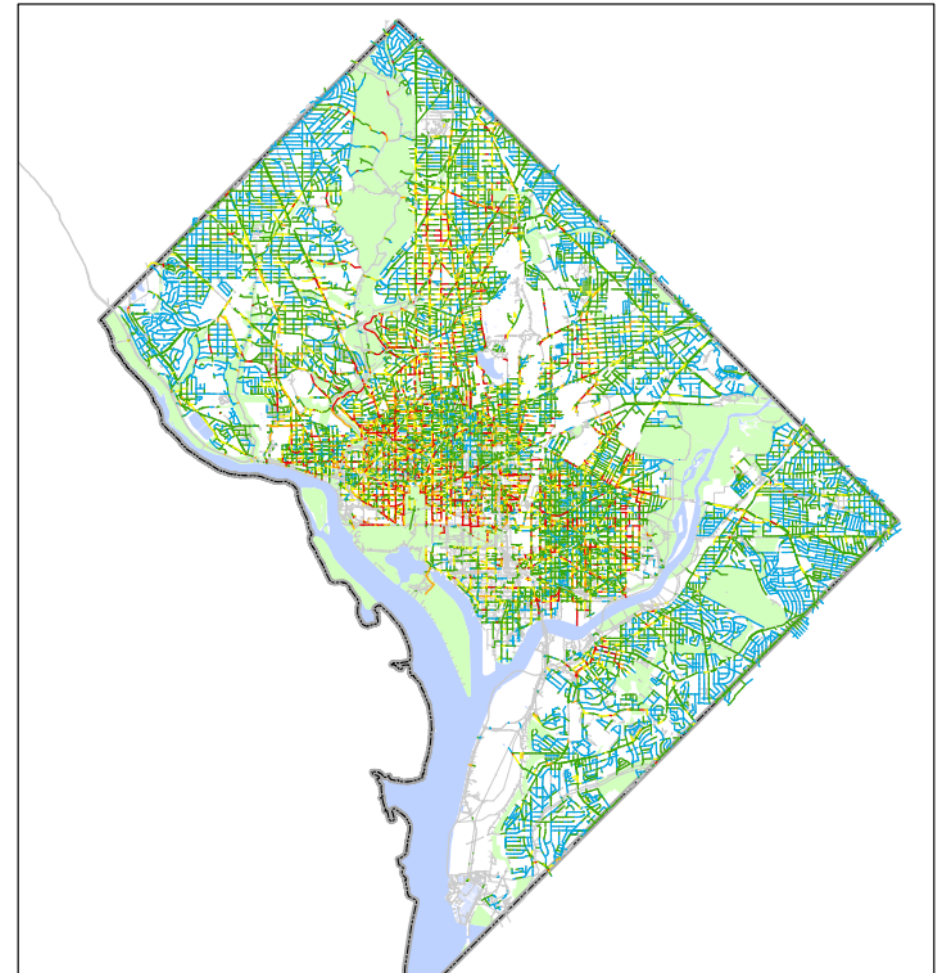

- 35% of system (incl. storm system)
- 48% of the sewer system only

Benefits:

- Impacts of performance or physical failure of assets to vulnerable communities are minimized.
- Improve/maintain level of service to customers
- Enhances overall resiliency of the system

New Local Sewer Projects

- (Inspection, Assessment, Design, and Rehabilitation) are added in the plan.

Legend

Small Diameter Risk Band	2 - Lower	Park
5 - Highest	1 - Lowest	DC Boundary
4 - Higher	Other Gravity Main	
3 - Moderate	Water Body	

Sanitary interceptor/trunk/ force mains sewers

- Rehabilitation of major sewers such as Anacostia Force Main, Potomac Interceptor, Rock Creek Main Interceptor, and others

New projects added & increased budgets:

- Increase Anacostia Force Main (AFM) Project (\$98 million)
- Increase North and South Interconnecting Branch Sewers Project (\$20 million)
- New Upper Potomac Interceptor Relief Sewer, Little Falls & Anacostia Main Interceptor Projects (\$87 million)

Address risks:

- Discharge of untreated wastewater to the environment
- Interceptors carrying high flows have high consequence of failure impacting large number of customers
- High cost of fixing broken pipes and cleanup
- National Pollutant Discharge Elimination System permit violations

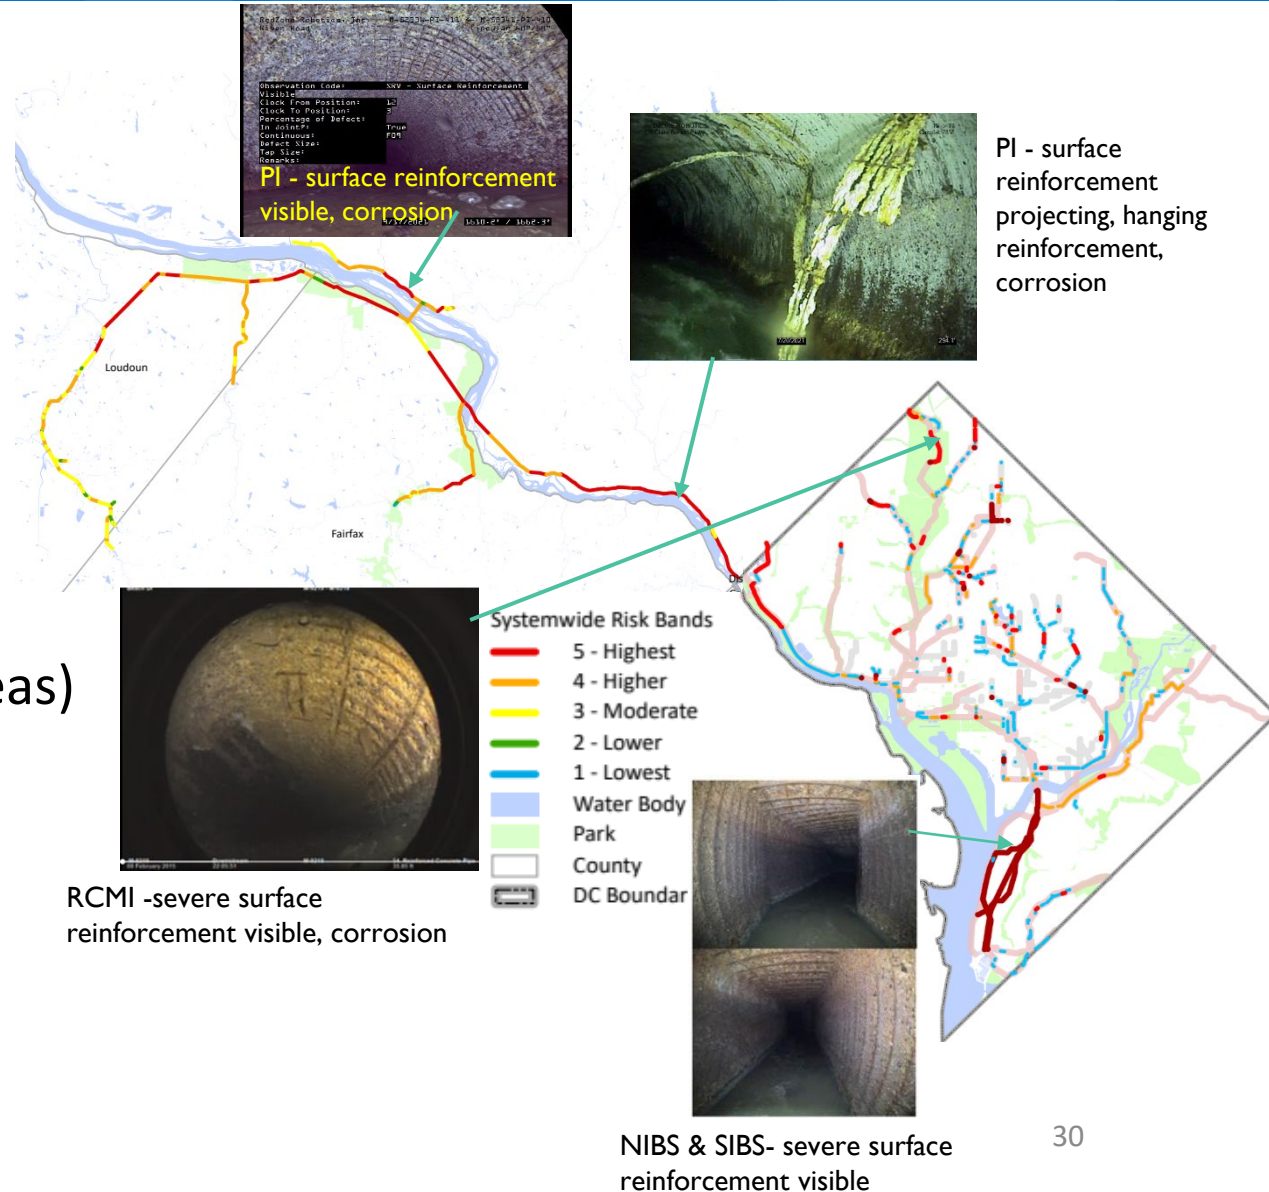

Critical Assets Identified by Recent Inspections

Very large sewers ($\geq 60''$ diameter)

	Very Large Sewers	PI
Next 5 years	22 miles	5.5 miles
Years 6 to 10	6 miles	3.3 miles
Beyond the next 10 years	10 miles	3.4 miles

- Total grade 4 & 5 pipes is 49 miles
- 37 miles (~30% of system, Includes all grade 5 areas) planned for rehabilitation in the 10 years.
- Challenges
 - Location (parks and sensitive areas)
 - Local community engagement
 - Permitting
 - Access

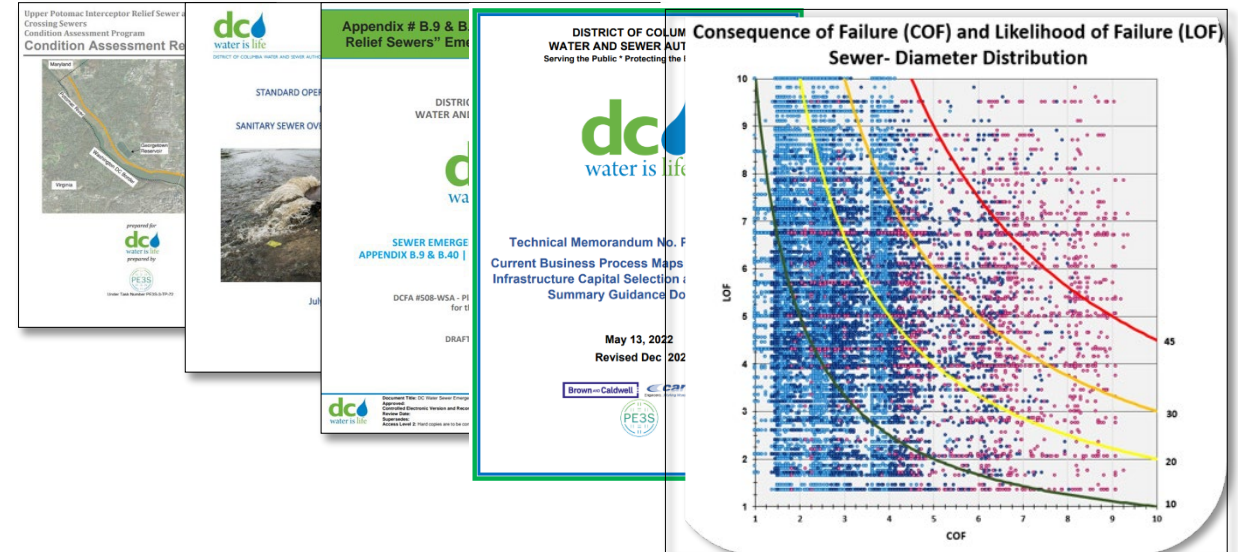

Sanitary Ongoing \$207M

- Addition of \$78M for new cleanouts
- Inspection of 1,400 miles <12-inch diameter local sewers.
- Cleaning and root control
- Emergency repair of collapsed and broken sewers.

Sewer Program Engineering Support \$50M

- Staff Augmentation.
- Programmatic Support for: Asset Management, Annual CIP Updates, Creek Bed and MS4 Outfall Program, Third-Party Design Review, Condition Assessment/Inspection Support for Linear assets.
- Prepare Concept Design Reports (CDR)
- Operations support include during sewer emergencies

Sanitary Pumping Facilities \$153M

- Maintain compliance with consent decree for firm capacity
- Address reliability and resiliency for climate change and flood hazards
- SCADA, Electrical, Mechanical
- Code Compliance, Safety
- Upgrades for Odor Control systems and HVAC
- Security Upgrades
- Solids handling improvements
- Variable Speed Drives upgrades

Overall Increase - \$341M

Water Distribution System - \$1.15B

Lead Free DC - \$732M

Water Pumping Facilities - \$48M

Water Storage Facilities- \$194M

Risk based prioritization incorporating equity considerations

Water Service Area - Summary

- Ramp up to 1.5% replacement rate per year for small diameter water mains.
- Anacostia 3rd high Pressure improvements (direct investment benefiting vulnerable communities)
- Upgrades to Interconnections with WSSC water system
- Replacement of distribution mains with Water Quality issues
- Critical Valve Replacement Program based on Operations' needs and Water Main Criticality

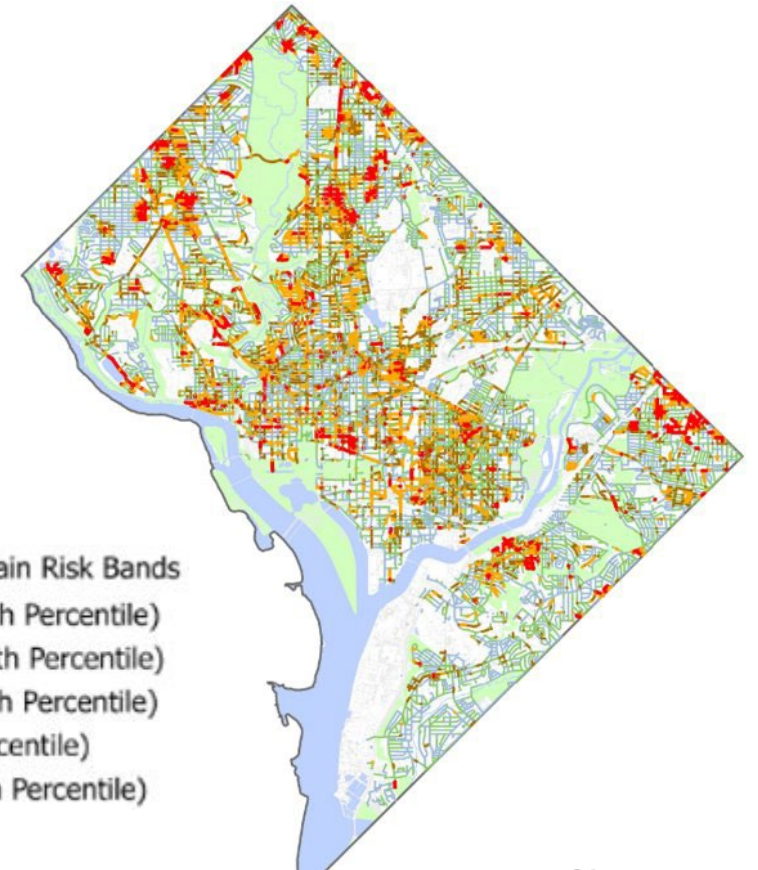

Benefits:

Impacts of performance or physical failure of assets to vulnerable communities are minimized.

Legend

Small Diameter Water Main Risk Bands

- Extreme (98-100th Percentile)
- High (Next 90-97th Percentile)
- Moderate (80-89th Percentile)
- Low (45-79th Percentile)
- Negligible (0-44th Percentile)

Water Storage Facilities \$193M

- 7 active storage facilities
- 6 storage facilities scheduled for construction or upgrades
- Evaluate new storage facility in 2nd High
- Per the study for Water Supply and storage needs, increase Ft. Stanton Reservoirs Project (\$84 million)
- Many structures have exceeded useful life (50-years). Therefore, these projects are for
 - Regular inspections and upgrades
 - EPA Sanitary Survey requirements

Water Pumping Facilities \$48M

- Bryant Street PS Spill Header continues construction
- 4th High Reno Booster Pump Station
- Anacostia Pump Station Electrical, Mechanical & Instrumentation Upgrades
- Many structures have exceeded useful life (50-years). Therefore, these projects are for regular inspections and upgrades

Figure C.13: Cone Valve – Typical Control Panel

Figure C.14: Cone Valve at P12 – Packing Leak

Anacostia Pump Station

Figure C.25: Pump Packing, Typical

Figure C.26: Sump Pump SP-1 and SP-2

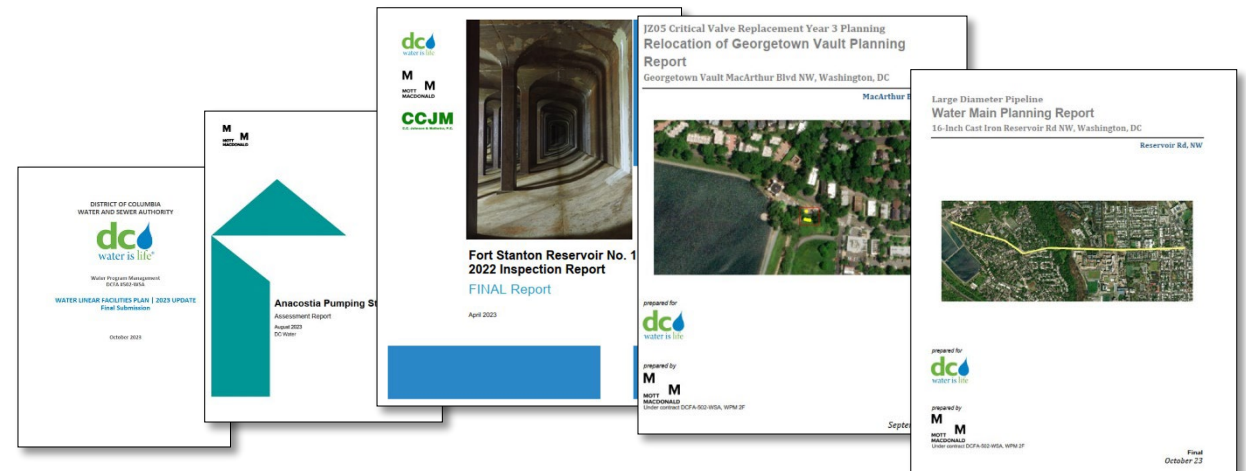

Water Ongoing \$182M

- Fire hydrant replacement
- Valve replacement
- Replacement of distribution mains with Water Quality issues
- Flushing of the water distribution system
- Repair pipe breaks

Water Program Engineering Support \$46M

- Asset Management of water mains
- Master Plan / Facilities Plan support
- Water assets feasibility studies
- Planning support, project development for CIP projects
- Provides technical support for planned inspection and condition assessment programs
- Provide subject matter expertise in hydraulic modeling and advise DC Water on additional needs
- Provides staff augmentation
- Provides operations support

Lead Free DC \$732M

- \$62M forecast spending in FY 2024
- Replace all lead services
- Confirm material of all services and update inventory
- Conduct community outreach
- Promote equity
- Pursue funding sources & grants

- The Proposed FY 2025 budget is \$31.5 million, a net increase of \$1 million compared to the FY 2024 budget
- Ten-year disbursements of \$347.4 million for capital equipment includes :
 - **Recurring Capital Equipment and Reserves** – This covers the purchase/replacement of pumps, motors, HVACs, roof, renovations, laptops, computers, servers, fire hydrants and includes the Authority-wide reserves for new facilities and unplanned equipment needs
 - **Information Technology (IT) Projects** – Funds new projects and upgrades to various Authority-wide technology systems
 - **Fleet Equipment** – Earmarks funding to ensure that crews have the required equipment such as backhoes, jet-vacs, small and large dump trucks to meet operational needs

\$ millions

- DC Water’s share of the Washington Aqueduct (WAD) 10-year capital program budget is \$357.5 million, which includes:
 - The proposed FY 2025 budget is \$35.8 million, which is an increase of \$223.6 thousand compared to the FY 2024 budget
 - Annual CIP estimates for FY 2025 beyond range from \$35.5 to \$35.8 million per year
 - This proposed budget includes funding for projects such as: Dalecarlia filtration building upgrades, renovations, roof replacements, HVAC upgrades, and emerging projects

	FY 2024 - FY 2033 Disbursement Plan										Last Years 10-yr	(Increase)/ Decrease	
	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028	FY 2029	FY 2030	FY 2031	FY 2032	FY 2033			10-yr Total
WASHINGTON AQUEDUCT	\$35,546,040	\$35,769,600	\$35,769,600	\$35,769,600	\$35,769,600	\$35,769,600	\$35,769,600	\$35,769,600	\$35,769,600	\$35,769,600	\$357,472,440	\$338,518,000	(\$18,954,440)

- Washington Aqueduct Capital Program Uncertainties (PFAS & Future Capital Expenses)
- Stormwater System Performance
 - New MS4 permit requirements and Cost of service study for stormwater is currently underway
- Water Supply (Source & Storage Volume; Reliability and Resilience)
- Unfunded Major Buried Infrastructure Needs
- Regulatory
 - Per- and Polyfluoroalkyl Substances (PFAS) (Water and Biosolids)
 - New National Pollutant Discharge Elimination System (NPDES) Permit
 - New DOEE Odor Control Regulations
 - Sanitary Survey Results due January 2024
- Climate Change – Seawalls, Facility Hardening, CSO Program, Stormwater Capacity
- Anacostia river sediment contamination (PCBs)
- Cured In Place Pipe curing methods

- Programmatic Approach to capture Federal and Industry Funding Opportunities
- Blue Plains Process Pilot for Intensification with Granulated Sludge (Increasing sludge density) Technologies to Reduce Cost of Future Capacity
- Blue Plains PdNA (Partial Denitrification-Annamox) Pilot to Reduce Cost and Dependence on Chemicals
- Implement Resource Recovery Options
 - Opportunities for Additional biogas utilization
 - Expansion of Solar Power Generation
 - Heat Recovery Options at Blue Plains / Sewer Heat Recovery for District Heating
- Implement a Microgrid within Blue Plains - Optimal Renewable Energy Distribution
- Diversify Bloom Products Marketing and storage for optimum sales
- CIP execution Improvements – Move from Design Bid Build to Collaborative Delivery and Project Consolidation.
