

Lead and Copper Compliance Report July through December 2011

Table 1 summarizes the District of Columbia Water and Sewer Authority's (DC Water) Lead and Copper compliance results for the monitoring period July through December 2011.

Table 1. Lead and Copper Summary Data

Number of Samples	
Total	100
90th Percentile First Draw Concentrations	
Lead mg/L	0.005
Copper mg/L	0.106
Service Line Materials	
Full Lead	65%
Partial Lead	35%

The appendices and attachments contain the following information and data:

- Appendix A: Lead and Copper Compliance Data
 - Table A.1 First Draw Lead Results
 - Table A.2 First Draw Copper Results

- Appendix B: Additional Monitoring Data
 - Table B.1 Second Draw Lead Results
 - Table B.2 Second Draw Copper Results

- Appendix C: Additional Sampling Information
 - Table C.1 Sample Kit Distribution
 - Table C.2 Sample Kits Not Returned
 - Table C.3 Samples Returned and Rejected for Compliance Analysis
 - Table C.4 Deviations from Sample Order
 - Table C.5 Sites with Compliance Results from July 2010 – June 2011 and No Results in July - Dec 2011

- Attachment 1: Washington Aqueduct Test Results for LCR Compliance
- Attachment 2: Other Additional Monitoring Data:
 - Customer requested tests
 - Post-lead service line replacement samples
 - Customer complaint investigations
 - Lead profiles
 - Research pipe loops
 - DC Water fountain samples
 - Other Research – Earthquake Samples
- Attachment 3: Customer Letter Distribution Certification

Appendix A: Lead and Copper Compliance Data

Table A.1 First Draw Lead Results

No.	Address	Pipe Material	Collection Date	Lead (mg/L) 1st Draw

Notes:

- 1) All addresses meet Tier 1 criteria under 40 CFR 141.86(a)(3)(ii) as single family structures with either full or partial lead service lines based on DC Water's customer information and service line inventory.
- 2) Service line material listings are representative of the pipe material known at the time the sample was collected.
- 3) Results expressed as "0.0000" may have been reported by the laboratory as non-detect or < 0.0005 mg/L.

Notes:

- 1) All addresses meet Tier 1 criteria under 40 CFR 141.86(a)(3)(ii) as single family structures with either full or partial lead service lines based on DC Water's customer information and service line inventory.
- 2) Service line material listings are representative of the pipe material known at the time the sample was collected.

Appendix B: Additional Monitoring Data

Tables B.1 and B.2 present results from the second draw samples collected at the time of the Lead and Copper Rule compliance sampling. Additional monitoring data presented in Attachment 2 to this report contains sample data collected from other DC Water programs that focused on lead, copper, or other metals that included lead sample results. A description of the program followed by the data set is included in Attachment 2.

Notes:

- 1) Service line material listings are representative of the pipe material at the time the sample was collected.
- 2) Results expressed as “0.0000” may have been reported by the laboratory as non-detect or < 0.0005 mg/L.
- 3) The second draw samples were rejected from two customers that submitted valid first draw samples because they did not follow the sampling criteria as described in the instructions.
- 4) One customer submitted a first draw sample collected before starting stagnation and a second draw sample collected at least six hours after stagnation. DC Water rejected the first draw and analyzed the second draw sample.

69	5301 RENO RD NW	11/14/2011	Water used during stagnation
70	605 Columbia Rd NW	11/14/2011	Chain of custody incomplete

Notes:

- 1) DC Water conducted LCR monitoring the week of August 22nd, 2011. The District and surrounding Virginia and Maryland areas experienced an earthquake on Tuesday, August 23rd at 2 pm. EPA Region III declared the 14 samples collected Tuesday after the earthquake and Wednesday morning could be considered “research” samples and not included for LCR compliance. The results for these samples are in Attachment 2 – Other Research – Earthquake Samples. DC Water collected samples from these homes again in November for LCR compliance (10 of the 14 submitted samples again).

Table C.4 Deviations from Sample Order

No.	Address	Scheduled Month	Deviation Reason
1	1010 10th St NE	July	Leaking faucet; requested next semester
2	1150 Abbey Pl NE	July	Request next month
3	1429 Ives Pl SE	July	Request next semester
4	1611 Webster St NW	July	Request removal from program
5	2435 33RD ST SE	Aug	Earthquake sample ^[1] ; Sample bottles dropped off again in Nov
6	2830 BRENTWOOD RD NE	Aug	Earthquake sample ^[1] ; Sample bottles dropped off again in Nov
7	307 7th St NE	Aug	Earthquake sample ^[1] ; Sample bottles dropped off again in Nov
8	3211 Central Ave NE	Aug	Earthquake sample ^[1] ; Sample bottles dropped off again in Nov
9	3216 Klinge Rd NW	Aug	Request next month; Sept samples rejected, sampled in Nov
10	3232 Klinge Rd NW	Aug	Earthquake sample ^[1] ; Sample bottles dropped off again in Nov
11	336 Quackenbos St NE	Aug	Earthquake sample ^[1] ; Sample bottles dropped off again in Nov
12	3618 PORTER ST NW	Aug	Earthquake sample ^[1] ; s Sample bottles dropped off again in Nov
13	3706 35th St NW	Aug	Earthquake sample ^[1] ; Sample bottles dropped off again in Nov

Washington Aqueduct Test Results for LCR Compliance Samples

US Army Corps of Engineers
Washington Aqueduct Laboratory

Lab Certification Number: DC00005

LEAD AND COPPER REPORT

District of Columbia Water and Sewer
Authority
Rich Giani
Bureau of Water Services
301 Bryant Street, NW
Washington, DC 20001

Report Date: 9/6/2011
Report Number: LC-W1108007-001

SAMPLE INFORMATION

Sample Number: 1108007-001 Customer Sample Number: 3032866 Project: LCR
Location: 1st draw 1262 COLUMBIA RD. NW Type: Dist.

Collection Date: 7/27/2011 Collection Time: 6:50 Sampler: HOME OWNER Received Date and Time: 8/1/2011 11:16:16 AM Received By: BSMITH

Parameter	Method	Action Level	MDL	RDL	Result	Analysis Date	Analyst
Iron	EPA 200.8	mg/L	5.1 ug/L	0.01 mg/L	0.064 mg/L	8/31/2011	TPasquale
Copper	EPA 200.8	1.30 mg/L	0.17 ug/L	0.001 mg/L	0.018 mg/L	8/31/2011	TPasquale
Lead	EPA 200.8	0.015 mg/L	0.07 ug/L	0.0005 mg/L	0.0005 mg/L	8/31/2011	TPasquale

Comment:

ND=Non-Detect

MDL = Minimum Detection Level

RDL = Reporting Detection Limit

Iron results are for informational purposes only and cannot be used for compliance.

Non-Regulated Lead Samples

Post Lead Service Line Replacement Samples

DC Water operates a CIP program where customer's public lead service lines are replaced when the main in the street is replaced. At that time, customers have the option to have their private line replaced at the homeowner's expense. In addition, DC Water has another program where a customer willing to replace their private lead service line, will be individually prioritized to have their public side replaced.

Four and one-half months after either a partial or full replacement conducted from both programs, lead test kits are then distributed to these customers for them to collect first and second draw samples similar to the LCR program. Samples are analyzed by the Washington Aqueduct and reported to DC Water.

This attached sample analysis data contains personal information of DC Water's customers, such as names and home addresses, the disclosure of which would constitute a violation of D.C. Code § 2-534(a)(2) and 5 U.S.C. § 552(b)(6). If EPA is requested to produce the sampling analysis data in whole or in part, in order to maintain confidentiality, the personal information must be redacted from the documents produced.

Customer Service Samples

DC Water operates a program where customers request a lead sampling kit on an annual basis. The kit comes with bottles and instructions on how to take first and second draw samples. Customers collect their own samples and contact DC Water to deliver the bottles to the Washington Aqueduct. Results are then reported back to the customer through DC Water's Customer Service Program.

This attached sample analysis data contains personal information of DC Water's customers, such as names and home addresses, the disclosure of which would constitute a violation of D.C. Code § 2-534(a)(2) and 5 U.S.C. § 552(b)(6). If EPA is requested to produce the sampling analysis data in whole or in part, in order to maintain confidentiality, the personal information must be redacted from the documents produced.

Lead Profile Information

During the second semester of 2010 DC Water conducted profiles at customer homes that had elevated lead from previous samples collected for compliance monitoring or from the customer service program. DC Water uses these results to help homeowners identify sources of lead. Samples were analyzed for Iron, Lead, Copper and Zinc.

This attached sample analysis data contains personal information of WASA's customers, such as names and home addresses, the disclosure of which would constitute a violation of D.C. Code § 2-534(a)(2) and 5 U.S.C. § 552(b)(6). If EPA is requested to produce the sampling analysis data in whole or in part, in order to maintain confidentiality, the personal information must be redacted from the documents produced.

Complaint Investigation

DC Water conducted water quality complaint investigations at a residential site. As part of this investigation, full metal analyses, including lead, were collected. Samples were collected at the influent and effluent of a point of entry home treatment unit as well as at a hydrant.

This attached sample analysis data contains personal information of WASA's customers, such as names and home addresses, the disclosure of which would constitute a violation of D.C. Code § 2-534(a)(2) and 5 U.S.C. § 552(b)(6). If EPA is requested to produce the sampling analysis data in whole or in part, in order to maintain confidentiality, the personal information must be redacted from the documents produced.

Galvanized Pipeloop Information

DC Water continued to monitor lead release from galvanized plumbing under pipeloop conditions. Water was changed once per week. At the end of the week, the reservoir was acidified to $\text{pH} < 2.0$ to mobilize any lead that may have adsorbed to the sides of the reservoir. The acidified reservoir sits for 24 hours and a sample from the reservoir is collected. Following collection of the acidified reservoir sample, the reservoir was emptied and rinsed, and new water added.

The Washington Aqueduct analyzed the samples for iron, manganese, lead, copper, and zinc, content. The Washington Aqueduct laboratory report lists several other metals with no number for the result. Metals listed with no result were not analyzed.

DC Water Fountain and Sink Samples

At the request of DC Water's Union, DC Water's water quality staff collected lead samples from all locations that are used by employees for drinking purposes. Sample sites included fountains and sinks at all DC Water owned facilities.

Sampling procedures included flushing lines for several minutes, stagnating for at least 15 hours and collecting samples using 250 mL plastic bottles. All samples were analyzed by the Washington Aqueduct.

Research

DC Water conducted LCR monitoring the week of August 22nd, 2011. The District and surrounding Virginia and Maryland areas experienced an earthquake on Tuesday, August 23rd at 2 pm. EPA Region III declared the 14 samples collected Tuesday after the earthquake and Wednesday morning could be considered “research” samples and not included for LCR compliance. DC Water collected samples from these homes again in November for LCR compliance (10 of the 14 submitted samples again).

Customer Letter Distribution Certification

DISTRICT OF COLUMBIA WATER AND SEWER AUTHORITY | 3900 DONALDSON PLACE, NW | WASHINGTON, DC 20016

January 6, 2012

William Arguto
U.S. Environmental Protection Agency Region III
1650 Arch Street
Philadelphia, PA 19103-2029

Re: Certification of Distribution of Consumer Test Results

Dear Mr. Arguto:

The District of Columbia Water and Sewer Authority (PWSID: DC000002) hereby certifies that for the lead and copper compliance monitoring period ending December 31, 2011, the “consumer notification of test results” have been distributed to the participating Lead and Copper Compliance monitoring customers in a manner consistent with the requirements of 40 CFR § 141.85(d). Pursuant to 40 CFR § 141.90(f)(3), attached are copies of sample consumer notifications.

Appendix A contains letters that were mailed to customers between July 1, 2011 and December 31, 2011.

Sincerely,

A handwritten signature in black ink that reads "Maureen Schmelling".

Maureen Schmelling
Manager (Acting), Drinking Water Division

Dear «First_name» «Last_Name»,

Thank you for participating in the Lead and Copper Water Monitoring Program administered by the District of Columbia Water and Sewer Authority (DC Water). Your participation helps us monitor the quality of drinking water in the District.

The sample results indicate the lead and copper levels were below the Environmental Protection Agency (EPA) action levels.

The potential for lead in drinking water varies among homes in the District. Drinking water is essentially lead-free in the distribution system and prior to entering a water service pipe. Lead can enter water that travels through a lead service pipe or other household lead sources, such as lead solder, lead-based fixtures and galvanized plumbing. A lead service pipe connects the water main in the street to your household plumbing. **According to our records, your home has a full or partial lead service pipe.** (If this information is inaccurate, please contact Customer Service at 202-354-3600.)

If you are pregnant or have children under age six, you should consider using cold, filtered tap water for drinking and cooking until all sources of lead are removed. This includes water used for making infant formula, beverages and ice.

Two water samples were collected from your household tap:

- First draw: Measures lead release from household plumbing and fixtures, especially potential lead sources near the tap where the sample is collected. (Required by EPA)
- Second draw: Measures lead release from the lead service pipe and household plumbing.

The EPA action levels for lead and copper are 15 parts per billion (ppb) and 1,300 ppb, respectively. An action level is the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow. The Maximum Contaminant Level Goals (MCLG) for lead and copper are zero and 1,300 ppb, respectively. The MCLG is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Sample	Lead Level (ppb)	Copper Level (ppb)
First	«Lead_mgL_1st_Draw»	«Copper_mgL_1st_Draw»
Second	«Lead_mgL_2nd_Draw»	«Copper_mgL_2nd_Draw»
EPA Action Level	15 ppb	1300 ppb

Lead can pose a significant risk to your health if too much of it enters your body. The greatest risk of lead exposure is to infants, young children and pregnant women. It can cause damage to the brain and kidneys, and can interfere with the production of red blood cells that carry oxygen to all parts of the body. Scientists have linked the effects of lead on the brain with lowered IQ in children. Adults with kidney problems and high blood pressure can be affected by low levels of lead more than healthy adults. Some people who drink water containing copper in excess of the action level may, with short term

exposure, experience gastrointestinal distress, and with long-term exposure may experience liver or kidney damage.

The District Department of the Environment (DDOE) provides information on blood lead testing for young children, pregnant women and nursing mothers. To learn more about protecting yourself and your family from lead exposure, contact DDOE at 202-654-6036 or visit www.ddoe.dc.gov.

Minimizing lead exposure involves the shared responsibility of DC Water and individual residents. DC Water encourages you to take the following steps:

Remove lead sources

- Replace your lead service pipe with copper. DC Water will replace your lead service pipe in public space if you choose to replace the private portion. For more information about lead service pipe replacement, contact Customer Service at 202-354-3600.
- Replace household galvanized plumbing. When lead is released from a lead service pipe and passes through galvanized plumbing (particularly over decades of use), lead can accumulate on the inside, corroded walls of this plumbing. Lead release from galvanized pipes can continue to occur even after a lead service pipe is replaced.
- Install lead-free plumbing fixtures certified to meet NSF Standard 61 Annex G (NSF 61-G). It is important to know that other fixtures may be labeled "lead-free" and still contain up to eight percent lead.
- Flush cold water taps after installing new household pipes or fixtures. New plumbing can release metals after installation. Flush for five minutes at a high flow rate once a day for three days.

Use filtered tap water

- Be sure to select a filter certified to meet NSF Standard 53 for lead removal. The filter package should specifically list the device as certified for removing the contaminant "lead."
- We recommend devices that are installed at your faucet tap (also known as point-of-use) or pitcher-style filters. You can search the NSF International website for certified drinking water filters at www.nsf.org/Certified/DWTU or call 1-800-673-8010.
- Be sure to routinely replace filter cartridges according to the manufacturer's instructions.

Do not use your hot water tap for drinking and cooking

- Always use cold tap water, then heat water if necessary. Boiling water does not reduce lead levels.
- Hot tap water can cause a greater amount of lead to release from plumbing. Always use cold tap water, including water used for making ice, beverages and infant formula.

Run the cold water tap when water is not used for several hours

- Run your cold water tap for two minutes before using it for drinking or cooking.
- Lead and other metals can dissolve in water when it sits in pipes for a few hours.

Remove and clean faucet aerators

- Lead particles and sediment can collect in the aerator screen located at the tip of your faucet.

We appreciate your participation in the Lead and Copper Water Monitoring Program. If you have additional questions, please contact the Drinking Water Division at 202-612-3440 or visit www.dcwater.com/lead.

Sincerely,

George S. Hawkins, General Manager
