

## 2011 Lead and Copper Rule Sampling Plan

### Sample Pool and Selection

The District of Columbia Water and Sewer Authority (DC Water) will collect samples from at least 100 sites listed in the revised sampling pool (Table 1). Sample sites meet Tier 1 criteria under 40 CFR §141.86(a)(3)(ii) as single family structures with either full or partial lead service lines based on DC Water's customer and service line inventory.

DC Water will schedule sample collection based on the following criteria:

1. Primary sites with full lead service lines.
2. Primary sites with partial lead service lines.
3. Secondary sites with full lead service lines.
4. Secondary sites with partial lead service lines.

Customers who participated in LCR sampling in their previous two sample events are designated as primary sites. Secondary sites represent sites added to the sample pool list since 2006 or sites that have not participated in their past two sampling events. DC Water added one site to the Sample Pool to maintain geographic distribution among the quadrants—1238 Half St SW.

DC Water will schedule and distribute samples in the order listed in Table 1. DC Water may sample locations out-of-order if the first sample submitted was rejected (refer to Criteria for Sample Acceptance section) and the customer requests a second test. DC Water may also sample out-of-order if the customer contacts DC Water to collect the sample after the scheduled pick up date. DC Water will not leave a sample kit under the following conditions:

- Partial lead service line replacement within 60 days of sample drop-off;
- Tier 1 status is suspect (e.g. possible condo conversion); or
- Construction near the home or the home is undergoing rehabilitation.

DC Water will investigate to determine if the site should remain in the sample pool; however, the site will not be sampled until the following compliance period unless requested by the customer.

### Sample Collection

DC Water will collect samples between January and June 2011 (first monitoring period) and July and December 2011 (second monitoring period). The homeowner will collect first and second draw samples following the instructions in the sample kit and complete the Chain of Custody form (reference Appendix A). The samples will be sent to a certified laboratory, currently the Washington Aqueduct (WA), to analyze the lead, copper, and iron concentrations using Environmental Protection Agency (EPA Method 200.8.)

## **Criteria for Acceptance as a Compliance Sample**

DC Water will forward samples to WA using the following criteria:

1. Bottles:
  - First draw sample bottle is full; and
  - First draw sample bottle is identified.
2. Chain-of-Custody or bottles have the following information:
  - Address on bottles match address on chain of custody;
  - Home is a single dwelling unit (i.e., answered “No” to having multiple dwelling units);
  - Date and time stagnation started;
  - Date and time sample collected;
  - Stagnation time between 6 to 18 hours;
  - No leaks or water use during stagnation; and
  - If the customer has a water treatment unit installed, they must have it bypassed for sampling.

DC Water will attempt to obtain any missing information from incomplete chain of custody forms by contacting the customer. DC Water will note the customer contact by logging the customer’s name, the date, questions asked, and customer responses. DC Water will transfer the missing information onto the chain of custody.

## **Sample Invalidation**

DC Water will request invalidation from EPA Region III for samples analyzed by WA laboratory based on 40 CFR §141.86 (f):

- The laboratory establishes that improper analysis caused erroneous results;
- The sample was taken from a site that did not meet Tier 1 criteria;
- The sample container was damaged during transit; or
- There is substantial reason to suspect that the sample was subject to tampering.

## **Notifying Customers of Results**

Under the revised LCR 40 CFR §141.85 (d), DC Water will mail sample results to the homeowner along with lead advisory information within 30 days of receiving sample results from the laboratory.

DC Water uses three standard letters to distribute lead test results (reference Appendix B). Letter #1 is used for first and second draw results at or below the lead action level. Letter #2 is used for first draw or first and second draw results above the lead action level. Letter #3 is used for homes with first draw results at or below the lead action level with a second draw result greater than 15 ppb. These letters have been revised to include EPA mandated language as stated under section 40 CFR § 141.85 (d).

DC Water has never obtained a first or second draw copper test result above the copper action level since the addition of chloramines. DC Water will provide customers with written notification if the copper test results exceed the copper action level.

## **Sample Pool Revisions (Table 2 and Table 3)**

Sites will be removed from the sample pool under the following conditions:

- Site does not meet Tier 1 criteria (e.g. condo conversion, no lead service line);
- Customer notifies DC Water that they do not want to participate;

- Customer cannot provide a valid sample (e.g. water treatment unit cannot be bypassed); or
- For the last four consecutive sampling events of a residence (i.e., sample kit dropped at residence), sample bottles were not returned from the residence.

Prior to the start of the next compliance period, DC Water will move secondary sites to the primary group if samples are collected from the site. Primary sites will be moved to the secondary list if they have not participated during their last two consecutive monitoring periods.

DC Water will assess the geographic distribution of the primary sites to ensure they are representative of the residential lead service line distribution in the District. DC Water will select new sites to improve geographic distribution if the sites are not representative of the lead service line distribution.

### **Reporting Format**

The lead and copper routine monitoring will be submitted in written and electronic format. The report format will comply with 40 CFR §141.90.

### **Optimal Corrosion Control Treatment Monitoring (OCCT)**

DC Water will monitor for the OCCT Water Quality Parameters (WQP) twice per calendar year at 10 sites as required by 40 CFR §141.87(e)(2)(i). In order to achieve seasonal variability, DC Water will collect samples at 5 sites on a quarterly basis beginning in February. Sites sampled in the first quarter of the year will also be sampled during the third quarter (August) of the year and sites sampled during the second quarter (May) will be sampled again during the fourth quarter (November). The parameters monitored will be pH, dissolved orthophosphate, nitrite, and free ammonia. DC Water will monitor at the 10 sites listed in Table 4 (no change from 2010 compliance monitoring). DC Water will report entry point data collected by the Washington Aqueduct along with the WQP distribution system data by January 10, 2012, which is within 10 days following the end of the OCCT WQP monitoring compliance period.

82	8 N St SW	Lead	Primary	Secondary	Customer did not return samples in last 2 sampling events
83	1238 Half St SW	Partial Lead	N/A	Added	Site added for geographic distribution

Notes for Table 2:

<sup>1</sup>The pipe materials listed are current (contain all updates listed in Table 3).

<sup>2</sup>Customers that do not return samples for four consecutive LCR sampling events are removed from the Sample Pool.

<sup>3</sup>Primary customers that do not return samples for two consecutive LCR sampling events are moved to secondary priority.

<sup>4</sup>Customers that are secondary priority and return samples are moved to primary priority.

**Table 3  
Pipe Material Changes**

No.	Address	Previous Pipe Material	Revised Pipe Material	Reason for change
1	3036 P St NW	Lead	Partial Lead	Customer reported copper at POE
2	308 9th St SE	Lead	Partial Lead	Customer reported copper at POE
3	3631 Ordway St NW	Lead	Partial Lead	Customer reported they replaced private-side in 5/2010
4	3917 8th St NW	Lead	Partial Lead	Customer reported private-side replacement on Chain of Custody
