

**POTOMAC INTERCEPTOR – LONG TERM ODOR ABATEMENT PROJECT  
CLARA BARTON PARKWAY AT LITTLE FALLS PUMPING STATION (BETHESDA, MD)**

### OVERVIEW

As part of a region wide effort to improve the quality and durability of sewers throughout the Washington Metropolitan Area, DC Water will be joining Loudon, Fairfax and Montgomery Counties in the construction of six facilities throughout the District of Columbia, Maryland and Virginia that will work as a system in collectively helping to reduce odors emitting from the Potomac Interceptor Sewer, as well as prolong the life of the pipeline.

One of the specific odor abatement facilities for this project will be located on Clara Barton Parkway in Bethesda, Maryland, adjacent to the Little Falls Pumping Station. As the building will sit on property owned jointly by the National Park Service (NPS) and US Army Corps of Engineers – Washington Aqueduct Division (WAD), DC Water has worked closely with both agencies to develop a design that will have minimal impact on the site. (See back page for construction location map)

### SCOPE OF WORK

This project involves the construction of an odor abatement facility adjacent to the Little Falls Pumping Station located on Clara Barton Parkway in Bethesda, Maryland. With a dimension of approximately 56 feet (length) x 26 feet (width), the new facility will be uniform in design with existing sub-station buildings on site.

### SCHEDULE

- Construction start: April 2010
- Construction completion: December 2012
- Normal work hours: 7:00 a.m. – 7:00 p.m., Monday through Friday
- Contractor may work at night or on weekends, dependent upon needed tie-in work or inclement weather

### IMPORTANT INFORMATION

- The construction of the odor abatement facility will generate certain levels of noise and vibration. These will be closely monitored.

### TRAFFIC

- Traffic control, including signage and protective barriers, will be set up to maintain public safety.

### PARTNERS

DC Water is currently working closely with various local civic groups and is also coordinating with the WAD, Montgomery County, the NPS and other federal agencies to ensure minimal disruption during this project.
