

POTOMAC INTERCEPTOR-LONG TERM ODOR ABATEMENT PROJECT FLETCHER'S BOAT HOUSE-CANAL ROAD (WASHINGTON, DC)

OVERVIEW

As part of a region wide effort to improve the quality and durability of sewers throughout the Washington Metropolitan Area, DC Water will be joining Loudon, Fairfax and Montgomery Counties in the construction of six facilities throughout the District of Columbia, Maryland and Virginia that will work as a system in collectively helping to reduce odors emitting from the Potomac Interceptor Sewer, as well as prolong the life of the pipeline.

One of the specific odor abatement facilities for this project will be located in Northwest, DC, at Canal Road and Reservoir Road. As the building will be constructed adjacent to the Fletcher's Boat House, on property that is owned by the National Park Service (NPS), DC Water has worked closely with this agency to develop a design that will have minimal impact on the site. (See back page for construction location map)

SCOPE OF WORK

This project involves the construction of an odor abatement facility adjacent to the Fletcher's Boat House located at Canal Road and Reservoir Road in Northwest, DC. Once completed, the new facility's design will include the following elements:

- Dimension of approximately 70 feet (length) x 30 feet (width)
- Uniform in design with surrounding buildings and structures
- Public restrooms that will be owned and operated by the NPS for visitors to the C & O Canal National Historic Park

SCHEDULE

- Construction start: April 2010
- Construction completion: December 2012
- Normal work hours: 7:00 a.m. – 7:00 p.m., Monday through Friday
- Contractor may work at night or on weekends, dependent upon needed tie-in work or inclement weather

IMPORTANT INFORMATION

- The construction of the odor abatement facility will generate certain levels of noise and vibration. These will be closely monitored.

TRAFFIC

- There will be reduced parking in the park area near the Fletcher's Boat House during construction.

PARTNERS

DC Water is currently working closely with various local civic groups and is also coordinating with the District Department of Environment (DDOE), the NPS and other federal agencies to ensure minimal disruption during this project.
