

DISTRICT OF COLUMBIA WATER AND SEWER AUTHORITY DEPARTMENT OF WATER SERVICES

3900 Donaldson Pl, N.W. WASHINGTON DC 20016

Lead and Copper Compliance Report January - June 2006

The District of Columbia Water and Sewer Authority (WASA) is below the lead action level at 0.010 mg/L for first draw samples and below the copper action level at 0.098 mg/L for first draw samples during the first semester 2006 compliance period. Table 1 summarizes the compliance results for the monitoring period January through June 2006.

Table 1. January - June 2006 Lead and Copper Compliance Results

Number of Sa	mples		
Total		110	
Compliance		104	
Invalidated		6	
90th Percentile Concentrations			
	<u>1st Draw</u>	2nd Draw	
Lead mg/L	0.010	0.012	
Copper mg/L	0.098	0.036	
Service Line	Materials		
Full Lead		82%	
Partial Lead		18%	

The appendices contain the following information and data:

- Appendix A: Lead and Copper Compliance Data
 - Table A.1 Lead Results
 - Table A.2 Copper Results
- Appendix B: Sampling and Customer Data
- Appendix C: Customer Sample Kit Distribution List
- Appendix D: Non-Compliance Lead Data
 - Table D.1 Customer Requested Lead Samples
 - Table D.2 Lead Service Line Replacement Samples
- Appendix E: Sample Invalidation Request and EPA Response dated June 30, 2006
- Appendix F: Locations Removed from Routine List

WASA collected samples from February through May 2006. A total of 18 samples were excluded from the 2006 compliance report: 12 samples used for 2005 compliance (refer to July through December 2005 report for these sample results) and 6 samples invalidated this semester (Appendix E).

Appendix A – Lead and Copper Compliance Data

Notes:

Some customers did not provide samples for either the first draw or second draw. In these cases, the table lists "N/A".

Data reported as zero may be non-detect or less than 0.0005 mg/L.

 Table D.2: Samples Collected After Partial Replacements (January through May 2006)

No.	Address	Pipe Replacement	Collection Date	Lead mg/L

Appendix E: Sample Invalidation Request from WASA and EPA Invalidation Response

Letter E.1 – WASA Request for Sample Invalidation

June 27, 2006

Karen Johnson (3WP32) Chief, Safe Drinking Water Act Branch U.S. Environmental Protection Agency Region III 1650 Arch Street Philadelphia, PA 19103-2029

Re: Request for Invalidation of First Semester 2006 Lead and Copper Rule (LCR) Compliance Monitoring Samples

Dear Ms. Johnson:

WASA requests the Environmental Protection Agency (EPA) invalidate six samples from the First Semester (January through June) 2006 LCR compliance calculations because new information determined that these sites no longer meet Tier 1 criteria. The following table lists the monitoring results and the justification for the invalidation request for each location. Further details of the reasons for invalidation follow the table. WASA will remove the addresses from the LCR routine monitoring list upon approval from EPA.

	Sample	Lead (mg/L) ¹		Copper (mg/L)		
Address	Collection Date	1 st Draw	2 nd Draw	1 st Draw	2 nd Draw	Justification
112 4 th St SE	2/8/2006	0.001	0.000	0.010	0.007	Multi-residence
1332 Vermont Ave NW	2/8/2006	0.000	0.000	0.014	0.005	Multi-residence
1226 D St NW	2/8/2006	0.000	0.000	0.018	0.013	Prior Invalidation
1527 33 rd St NW	2/8/2006	0.002	0.003	0.008	0.028	Full Replacement
2211 39 th St NW	3/7/2006	0.003	0.000	0.010	0.019	Full Replacement
3835 Beecher St NW	3/8/2006	0.001	0.001	0.012	0.004	Full Replacement

Multi-residence—112 4th St SE and 1332 Vermont Ave NW

WASA determined 112 4^{th} St SE and 1332 Vermont Ave NW were no longer single-family homes required for Tier 1 status.

The customer at 112 4th St SE wrote their address as, "112 4th St SE, #3" on the Chain of Custody form. The customer at 1332 Vermont Ave NW wrote their name as, "1332 Vermont Ave Part". These address differences were identified during WASA's quality control process after sample submittal to the laboratory. WASA investigated each site and determined the buildings had multiple residences.

<u>Prior Invalidation — 1226 D St NE</u>

_

¹ Results reported as "0.000" may have been reported by the laboratory as non-detect or < 0.0005 mg/L.

WASA collected an LCR sample at 1226 D St NE on February 8, 2006. In response to EPA's February 22, 2006 letter, WASA reviewed the pipe materials of existing LCR addresses. WASA test pitted this address in March 2006 and found copper on the public and private sides of the property. WASA submitted a request to invalidate second semester-2005 compliance monitoring samples on March 27, 2006 based on this finding. EPA concurred with the non-Tier 1 status in a letter to WASA dated April 10, 2006.

Full Replacement — 1527 33rd St NW

WASA replaced the public portion of the service line at 1527 33rd St NW in March 2004. WASA did not record the private side material at the time of the public side replacement. WASA collected an LCR sample on February 8, 2006. WASA test pitted this address on March 7, 2006 and found copper on the public and private sides of the property.

Full Replacement — 2211 39th St NW and 3835 Beecher St NW

Current staff recalled WASA's predecessor agency replacing some lead service lines in the 2200 block of 39th St, NW and the 3800 block of Beecher St NW during the early 1990's. WASA test pitted two addresses located on those blocks because the locations are included in the current LCR monitoring program. WASA found full copper service lines at 2211 39th St NW and 3835 Beecher St NW.

Appendix A contains the laboratory reports for all addresses. Appendix B contains the Chain of Custody forms for all addresses. Appendix C contains the test pit reports for the four addresses noted as full replacements in the table.

If you have any further questions regarding this request, please contact Richard Giani at (202) 612-3441.

Sincerely,

Charles W Kiely Assistant General Manager, Consumer Services

Letter E.2 – EPA Invalidation of Six Lead and Copper Samples

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY REGION III 1650 Arch Street Philadelphia, Pennsylvania 19103-2029

June 30, 2006

Mr. Charles Kiely Assistant General Manager, Customer Services District of Columbia Water and Sewer Authority 301 Bryant Street, NW Washington, DC 20001

Dear Mr. Kiely:

This letter is in response to your letter of June 28, 2006, that requests six samples from the January – June 2006 monitoring period be invalidated. The samples are listed in the enclosure to this letter.

Pursuant to 40 CFR 141.86(f), EPA may invalidate a lead or copper tap water sample if, among other things, EPA learns that the sample was taken from a site that did not meet the site selection criteria of 40 CFR 141.86. For purposes of 40 CFR 141.86(f), the term "invalidate" means that the sample should not be counted to determine the lead or copper 90th percentile levels under 40 CFR 141.80(c)(3) or toward meeting the minimum monitoring requirements of 40 CFR 141.80(c). Pursuant to 40 CFR 141.90(g), data collected in addition to those data which are required by the regulations should be reported within the first ten days following the end of the applicable monitoring period, even if that data is not used to calculate the lead or copper 90th percentile requirements.

EPA has reviewed WASA's request and its supporting documentation and agrees that the six samples can be invalidated and should not be used to calculate the 90th percentile levels for lead or copper. A copy of EPA's rationale for this decision is enclosed. WASA must collect the minimum number of samples required for the monitoring period. If WASA does not have the minimum number of samples required for the monitoring period, WASA must collect replacement samples to reach the minimum number of samples required for the monitoring period under 40 CFR 141.86(c) no later than 20 days from receipt of this letter, from appropriate Tier 1 locations. Replacement samples from the invalidated sample sites are not appropriate because the sites do not meet the tier 1 site selection requirements of 40 CFR 141.86(a)(3). Replacement samples taken after the end of the applicable monitoring period may not be

used to meet the monitoring requirements of a subsequent monitoring period. The replacement sample must be taken at locations other than those already used for sampling during the January – June 2006, monitoring period. (40 CFR 141.86(f)(4)).

If you have any questions, I can be reached at 215-814-5445.

Sincerely,

Karen D. Johnson, Chief Ground Water and Enforcement Branch

Enclosure

ENCLOSURE 1

<u>Invalidation of samples submitted by WASA (DC 0000002) for January – June 2006</u> <u>Compliance Monitoring Period for Lead and Copper</u>

On June 28, 2006, the District of Columbia Water and Sewer Authority (WASA) submitted a request to invalidate 6 samples taken for compliance with the Lead and Copper Rule for the January – June 2006 compliance monitoring period. Pursuant to 40 CFR 141.90(a)(1), the water system must submit the results of all tap samples including the location and criteria under which the site was selected for the system's sampling pool. For the following sampling locations, WASA submitted chains of custody, laboratory results, and information relating to the service line such as test pit documentation. WASA did not submit information to show that any of the houses had copper pipes with lead solder installed after 1982 and before 1988 (DC lead ban effective date).

As stated in EPA and WASA's conference call of March 21, 2006, the best information available at the time of sampling <u>and</u> at the time of reporting must be used by WASA to identify tier 1 locations. Thus, if at the time of sampling, the best information available to WASA supports a determination that a particular sampling location qualifies as a tier 1 location, samples taken from that location may be analyzed with the intent to use them to determine the lead or copper 90th percentile levels under 40 CFR 141.80(c)(3) and toward meeting the minimum monitoring requirements of 40 CFR 141.86(c). However, if it is determined at a later date <u>prior</u> to reporting that the sampling location did not in fact qualify as a tier 1 location, then WASA should request invalidation of that sample under 141.86(f) prior to or at the time of reporting required by 40 CFR 141.90(a). EPA has reviewed WASA's information and has determined that the six samples should be invalidated pursuant to 40 CFR 141.86(f).

- 112 4th St, SE, sample collected on February 8, 2006
- 1332 Vermont Ave., NW, sample collected on February 8, 2006
- 1226 D Street, NE, sample collected on February 8, 2006
- 1527 33rd St., NW, sample collected on February 8, 2006
- 2211 39th St., NW, sample collected on March 7, 2006
- 2825 Beecher St., NW, sample collected on March 8, 2006

The requirements for invalidation are set out in 40 CFR 141.86(f). If one or more of four conditions listed in 40 CFR 141.86(f)(i-iv) are met, the state, or EPA, may invalidate a sample. Each address is discussed below.

A. 112 4th St, SE, and 1332 Vermont Ave., NW

EPA has found that the samples taken from these sites did not meet the site selection criteria of 40 CFR 141.86 (40 CFR 141.86(f)(1)(ii)). At the time of sampling, WASA believed that these addresses were single-family structures. However, the chains of

custody revealed that the occupant addresses indicated multi-unit dwellings. 40 CFR 141.86(a)(3) states that sites selected for a community water system's sampling pool ("tier 1 sampling sites") shall consist of single family structures. The samples taken at these sites must be invalidated, i.e., may not be counted to determine the lead or copper 90th percentile levels under 40 CFR 141.80(c)(3) or toward meeting the minimum monitoring requirements of 40 CFR 141.86(c).

B. 1226 **D** Street, **NE**

This location was determined not to meet the requirements of a tier 1 sampling locations in an April 10, 2006 letter from EPA to WASA. The location does not have a lead service line. WASA has submitted information to EPA showing that test-pits were conducted on the service lines for this address prior to the monitoring period. At the time of sampling for the January – June 2006 monitoring period, WASA was or should have been aware that this address had a non-lead service line for the public and private portion. Accordingly, the samples taken at this site must be invalidated, i.e., may not be counted to determine the lead or copper 90th percentile levels under 40 CFR 141.80(c)(3) or toward meeting the minimum monitoring requirements of 40 CFR 141.86(c).

C. 1527 33rd St., NW

In the June 28, 2006 letter, WASA provided information indicating that the public portion of the service line at this address was replaced in March 2004. WASA submitted test pit information from March 2006 indicating copper service material on both the public and private side of the service line. It must be noted that this address was not included in WASA's 2004 Lead Service Line Replacement Report. Accordingly, the samples taken at this site must be invalidated, i.e., may not be counted to determine the lead or copper 90th percentile levels under 40 CFR 141.80(c)(3) or toward meeting the minimum monitoring requirements of 40 CFR 141.86(c).

D. 2211 39th St., NW and 2825 Beecher St., NW

For 2211 39th St., NW and 2825 Beecher St., NW, WASA has submitted information to EPA showing that test-pits were conducted on the service lines for these addresses after the samples were collected, but prior to the end of the monitoring period. At the time of the sampling, the WASA's inventory showed that these addresses had lead service lines and thus qualified as tier 1 locations. Therefore the samples were sent for analysis. Upon consultation with staff familiar with service line replacement work done at or near these addresses by WASA's predecessor agency in the 1990's, test pits were ordered. The test pits revealed that both houses have copper service lines, on both the public and private portions. Accordingly, the samples taken at this site must be invalidated, i.e., may not be counted to determine the lead or copper 90th percentile levels under 40 CFR 141.80(c)(3) or toward meeting the minimum monitoring requirements of 40 CFR 141.86(c).

Calculation of 90th Percentile for Lead and Copper

The invalidated samples cannot be used to compute the 90th percentile for the lead and copper samples. Further, replacement samples from the invalidated sample sites are not appropriate because the sites do not meet the tier 1 site selection requirements of 40 CFR 141.86(a)(3). 40 CFR 141.86(f)(4) requires the water system to collect replacement samples if they have not collected the minimum number of samples required for the monitoring period.

WASA is therefore required to collect replacement samples at six (6) tier 1 locations within 20 days of receipt of a letter from EPA that determines the invalidation. If WASA does not collect a sufficient number of samples within 20 days, they are subject to a violation of 40 CFR 141.86(c) for failure to collect the minimum number of samples required for a monitoring period. A 90th percentile value can still be calculated based on the number of samples collected, pursuant to a March 9, 2004 guidance memorandum "Compliance Calculation Under the Lead and Copper Rule" signed by Cynthia Dougherty, Director of the Office or Ground Water and Drinking Water.
