VARIANCE ANALYSIS FOR MAJOR REPORTED ITEMS

At the end of January 2020, cash receipts totaled \$245.0 million, or 35.3 percent of the FY 2020 budget. Several categories of customers make payments on a quarterly basis, including the Federal Government (which made their second quarterly payment in January), and wholesale customers (who made their first quarter payment in November).

Areas of Overcollection	Areas of Undercollection
<p>Residential, Commercial and Multi-Family - Receipts for this category are higher at \$135.5 million or 34.0 percent of the budget. The higher receipts are due to increased year-end billing of the unbilled accounts.</p> <p>Federal - Actual receipts through January 2020 total \$36.4 million or 50.6 percent of the budget. The Federal government made their second quarter payment in January 2020.</p> <p>DC Housing - Receipts are slightly higher at \$3.7 million or 34.8 percent of the budget.</p> <p>District Government - Receipts are slightly higher at \$6.2 million or 35.4 percent of the budget due to higher CRIAC receipts than the budget.</p> <p>Other Revenue - Actual receipts through January 2020 total \$16.5 million or 41.5 percent of the budget category. The receipts are higher due to (i) \$1.7 million payment received in October 2019 from the District Government for the fourth quarter 2019 short-payment of Fire Protection Service Fee that was due in August 2019 and (ii) higher Development Contractor Water and Sewer Service Fees.</p>	<p>Wholesale - The wholesale customer actual receipts through January 2020 total \$20.4 million or 24.7 percent of FY 2020 budget. The second quarter payment for wholesale customers is expected to be received in February 2020.</p>

VARIANCE ANALYSIS FOR MAJOR REPORTED ITEMS

Total operating expenditures for this period (including debt service and the Right-of-Way & PILOT fees) totaled \$175.8 million or 28.6 percent of the FY 2020 Board-approved budget of \$614.5 million. These numbers include estimated incurred but unpaid invoices and are subject to revision in subsequent months.

Areas of Underspending
Personnel Services – Underspending is primarily due to vacancies and lower than anticipated benefits costs. Of the 1226 positions authorized, 1097 were filled at the end of January with a vacancy rate of 11 percent. Overtime is at \$2.7 million or 34% of the annual budget.
Contractual Services – Spending is in line with expectations at this time of the fiscal year.
Water Purchases – Reflect DC Water’s share of Washington Aqueduct expenditures.
Supplies & Chemicals – Spending is in line with trends at this time of the fiscal year.
Utilities – Underspending is primarily due to lower than budgeted electricity unit prices. A total of 15MW of the Authority’s electric load is locked at an average Western Hub price of \$29.81/MWh for the remainder of the fiscal year.
Debt Service – YTD underspending is due to the refunding of the 2013 Series A bonds of roughly \$2.4 - \$2.7 million. In addition, the projected debt service cost in the proposed financial plan is lower than the Board-approved budget.

Investment Performance Report – January 2020

Economic Update**

ECONOMIC COMMENTARY

- The U.S. economy continues to grow at a moderate pace entering into the 11th year of the economic expansion. For the first estimate for the fourth quarter of 2019, U.S. Gross Domestic Product (“GDP”) increased at an annual rate of 2.1%, according to the Bureau of Economic Analysis. The growth in the fourth quarter was attributed an increase in trade activity and moderate consumer spending.
- The Federal Open Market Committee (“FOMC”) elected to maintain their target rate range of 1.50% and 1.75% at their January meeting, as expected. Consumer spending was described as “moderate” in January, while business investment remained weak. The January FOMC statement described the current stance of monetary policy as appropriate to support “inflation returning to the committee’s symmetric 2% objective.”
- U.S. Treasury yields declined as investors flocked to safe-haven assets due to the concerns that surrounded the coronavirus. Due to the increased number of coronavirus cases, companies closed factories and retail stores in China and officials from various countries discouraged unnecessary travel to and from China. On January 31, 2019, the day ended with a slight yield curve inversion between the 10-year and 3-month Treasuries, which historically was one of the first signals of a recession.
- According to the U.S. Bureau of Labor Statistics, employers added a robust 225,000 jobs in January, a sign that the U.S. labor market is still in a good position to continue economic growth into 2020. Significant job gains occurred in the construction, healthcare, transportation, and warehousing sectors. Over the past three months, the U.S. economy added an average of 211,000 jobs. The unemployment rate steadied at 3.6% as the labor participation rate slightly up ticked to 63.4% in January.

PORTFOLIO RECAP

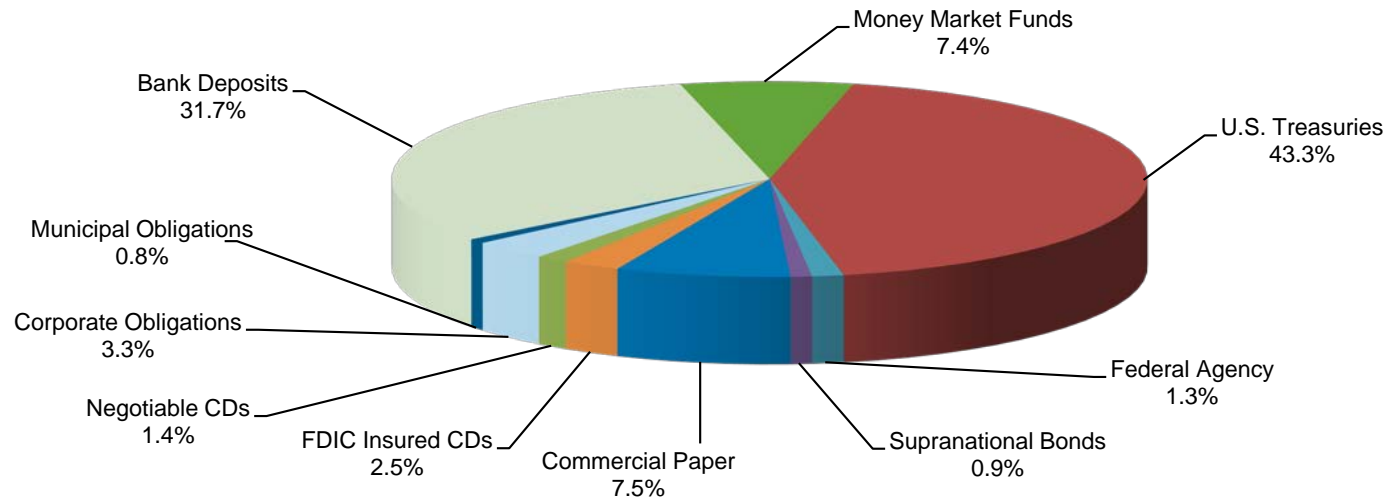

- The portfolio is diversified among Bank Deposits, U.S. Treasuries, Federal Agencies, Commercial Paper, Supranational Bonds, Negotiable CDs, Corporate Notes/Bonds, Municipal Bonds, FDIC Insured CDs, and SEC registered money market funds.
- The overall yield-to-maturity on cost of the portfolio is 1.56%.

Operating Reserve

- The investment advisor (PFMAM) purchased \$2.7 million of U.S. Treasury notes at a yield of 1.75%.
- PFMAM also purchased \$0.3 million of a corporate note in the 3-year maturity range at a yield of 1.85%.
- The Authority purchased a combined \$5.3 million in 1-year Industrial Bank CDARs.

Appendix: Economic Update

Economic Growth Consistent During Fourth Quarter

- U.S. economic activity continued to experience moderate growth during the final quarter of 2019.
 - The first estimate of U.S. GDP growth for the fourth quarter came in at 2.1%, consistent with the previous quarter's final estimate.
 - The growth last quarter is largely attributed to a boost from trade, as net exports comprised 1.5% of the 2.1% growth figure, the largest contribution in over ten years.
- For the year, GDP grew at 2.3%, which is equal to the average pace that has marked the current economic expansion since 2009.

Labor Market Job Growth Above Expectations

- The U.S. economy added 225,000 jobs in January, above Bloomberg’s expectation of 165,000.
- The January unemployment rate came slightly above expectations at 3.6%, though still near all-time lows.

The U.S. Treasury Yield Curve Re-Inverts

- U.S. Treasury rates declined during the January amid the coronavirus outbreak. Investors generally fled to quality as uncertainty surrounding the virus continued, causing a decline in yields.
- As of January 31, 2020, the yield curve re-inverted to have longer duration securities provide less income compared to those with shorter durations.

Capital Improvement Program Report 1st Quarter FY2020

CIP Disbursement Performance

Current projected program disbursements through the end of the fiscal year compared with the proposed FY20 baseline are shown in the chart below:

Disbursement Summary

Current projected fiscal year 2020 CIP disbursements are \$396,837,000 through the end of September 2019, which is on track to meet the proposed baseline disbursement projection of \$405,004,000.

Current disbursement projections within the service areas are as follows:

Non-Process Facilities

Baseline Disbursements	\$42,066,000
Projected Disbursements	\$40,464,000 (\$1.6M below baseline projection)

There are no significant project variances for this service area currently projected over the fiscal year.

The spending through the first Quarter is \$4.5M, which is \$2.0M below the baseline. This underspending is mainly due to the delay in awarding the Fleet Facility and Sewer Headquarters construction contracts.

Capital Improvement Program Report 1st Quarter FY2020

Wastewater Treatment Service Area

Baseline Disbursements	\$77,536,000
Projected Disbursements	\$75,488,000 (\$2.1M below baseline projection)

There are no significant project variances for this service area currently projected over the fiscal year.

The spending through the first Quarter is \$10.1M, which is \$14.8M below the baseline. This is primarily from underspending in the Liquid Processing Program Area (\$3.4M) due to disbursements for the Upgrades to Filtration Influent Pumps 1-10 and Replacement of Influent Screens being lower than anticipated during the construction startup period. The spending on these projects is expected to recover by the end of the fiscal year. Furthermore, lower disbursements in the ENR Facilities Program Area (\$8.9M below baseline) are due to continued negotiations to close out the contract for the Tunnel Dewatering Pumping Station/Enhanced Clarification Facility, which had been planned to be closed out in the first quarter.

For clarity, the Combined Sewer Overflow (CSO) Service Area comments are addressed separately by the CSO and DC Clean Rivers Program Areas:

CSO Service Area

Baseline Disbursements	\$7,952,000
Projected Disbursements	\$6,913,000 (\$1.0M below baseline projection)

Lower disbursements are due to invoicing lag on the work on the O Street Station ventilation system.

DC Clean Rivers Program Area

Baseline Disbursements	\$162,197,000
Actual Disbursements	\$165,941,000 (\$3.7M above baseline projection)

There are no significant project variances for this service area currently projected over the fiscal year.

The overspending through the first quarter is mainly attributable to the Northeast Boundary Tunnel work progress in the field. The DCCR team currently anticipates the spending to meet the baseline forecast by year end

Stormwater Service Area

Baseline Disbursements	\$6,869,000
Projected Disbursements	\$6,576,000 (\$0.3M below baseline projection)

There are no significant project variances for this service area currently projected over the fiscal year.

Capital Improvement Program Report 1st Quarter FY2020

Sanitary Sewer Service Area

Baseline Disbursements	\$44,934,000
Projected Disbursements	\$41,692,000 (\$3.6M below baseline projection)

Significant project variances are listed below:

- *Sanitary Trunk Sewers Program Area – (\$4.4M below baseline)*
 - The first quarter disbursements for project IL - Creekbed Sewer Rehabilitation 2 were \$1.4M below baseline, mainly attributable to a delay in the contract closeout.
 - The disbursements for project LZ00 - Potomac Interceptor Projects - Rehab Phase 2 were \$1.4M below baseline, mainly attributable to the administrative charges expected in the first quarter did not materialize.

Water Service Area

Baseline Disbursements	\$62,163,000
Projected Disbursements	\$58,602,000 (\$3.6M below baseline projection)

There are no significant project variances for this service area currently projected over the fiscal year.

Significant project variances for the first quarter are listed below:

- *Water Distribution System Program (\$9.5M below baseline projection)*
 - The first quarter underspending is mainly attributable to delays in closing out Small Diameter Water Main contracts in Project DE - Small Diameter Water Main Rehab 12 and Project O3 - Small Diameter Water Main Rehab 11.
- *Water Ongoing Program Area (\$1.8M below baseline projection)*
 - This area is below the forecast but within the expected limits of the forecasting accuracy as the number and size of water main breaks are difficult to predict year on year.

Intent to Reimburse Capital Expenditures with Proceeds of a Borrowing

Intent to Reimburse Capital Expenditures

- The Intent to Reimburse Capital Expenditures with Proceeds of a Borrowing is approval to reimburse DC Water for “Costs of the System” as defined in the Master Indenture; allows DC Water to reimburse itself for capital expenditures with debt proceeds
- For FY 2020 and FY 2021 the amount requested is \$650 million; DC Water has three years from the time of the last expenditure to make the reimbursement
- As part of the request to issue a specific series of debt in the future, the Board will be asked to adopt a specific resolution that confirms the intent for the actual amount financed (i.e. \$350 million for 2021 Series A and B) with actual reimbursed expenses

- WEB credit card fees projected to cost \$1 million for FY2020

WEB Processing Concerns

- The increase in WEB transactions and fees have increased costs for DC Water each year from FY2016 – FY2019
- Payment aggregators or proxies are using their rewards cards via corporate credit cards (i.e. fleet card, fuel cards, etc.) to process payments, while DC Water absorbs the fees
 - Aggregators or management companies create accounts for business owners and make WEB credit/debit card payments on their behalf
 - Aggregators are shifting from lower cost ACH payments averaging \$0.20 per transaction to higher cost WEB payments averaging \$7.22 per transaction
 - DC Water cannot discriminate against different card types

ACH Shift to WEB Processing Comparison

Example of one commercial customer who converted from ACH payment processing to WEB from FY2017 – FY2019

- DC Water average costs, via ACH, total \$335 from FY2017 – FY2019
- DC Water comparison costs via, merchant card, total \$10,547

DC Water non-residential cost comparison shows a projected percentage increase at 2001% over four years

WEB Profile vs WEB Guest

💧 The WEB portal is one of several payment channels for DC Water customers

Profile Account	Non-Profile Account
<ul style="list-style-type: none"> • Authenticated • Customers create a profile account with DC Water to input their account number, service address, and credit card information to make payments 	<ul style="list-style-type: none"> • Unauthenticated or Guest portal • Customers enter account number and dollar amount only • Bypasses critical credit card steps to validate card information
<ul style="list-style-type: none"> • Customers need to log-in • Validates a Level 2 or Level 3 authentication level for better merchant card pricing 	<ul style="list-style-type: none"> • Customers do not need to log in • Level 1 results in the most expensive way for a business to accept a credit card, and less information is required from customers

Plan Forward

Lower Fee Plan

💧 Non-Viable Options

- Payment gateway fee problem

💧 Viable Options

- Pass all fees to credit card processing customers
 - DC Water loses utility rate
- RFP for payment gateway services
- Block all non-residential credit card processing
 - DC Water fee solution

Payment Gateway Fee Problem

- DC Water could negotiate with a payment gateway vendor to provide a contractual lower flat fee for merchant card services where DC Water
 - Payment gateway services will provide a lower flat fee for merchant card processing, but ACH fee would increase
 - Potential average \$2.00 per transaction fee for merchant card and ACH payments combined
 - Credit card costs will decrease, but ACH costs will increase

Fee Type	Transactions	Fee	DC Water Cost
Merchant Card	420,000	\$2.00	\$840,000
ACH	550,000	\$2.00	\$1,100,000
Total	970,000	\$2.00	\$1,940,000

Pass Fee to CC Customers

- 💧 Contract payment gateway services for a lower flat fee
- 💧 Payment gateway vendor would charge an average of \$8.00 per transaction for merchant (credit/debit) card customers
 - Fees based on number of customers and transactions processed
 - Fewer customers equal increased fee costs
- 💧 Costs absorbed by DC Water
 - Credit/debit card costs will be \$0.00 annually
 - ACH costs could range from \$100,000 - \$125,000 annually

Fee Type	Transactions	Fee	DC Water Cost	Customer Cost
Merchant Card	420,000	\$8.00	\$0.00	\$3,360,000
ACH	550,000	\$0.20	\$110,000	\$0.00

DC Water Loses Utility Rate

- If a fee is passed to any customer, DC Water loses the utility rate
- Example – If DC Water wanted to pass fee to Com/MF/Merch and continue to absorb fee for Residential customers, DC Water would lose the utility rate of \$0.75 per customer
 - $\$0.75 + 1.00\% - 1.50\% \text{ rewards} = \$1.75 - \$2.25$ per transaction

RFP for Payment Gateway

- If DC Water issued a payment gateway RFP, it would include merchant card services to decrease the number of payment channels and potentially reduce contractual costs

- Current payment gateway vendors
 - Kubra

 - PayPal

 - Bank of America Merchant Services (BAMS)

- Current merchant card services contract through BAMS
 - Merchant services solicitation began Dec 2018

Block Non-Residential CC Processing

- Block all non-residential credit card processing to allow only residential customers to make credit card payments
- This will eliminate payment aggregators from processing high end rewards cards across all of DC Water's payment type platforms
- DC Water's credit card processing fees will be reduced

DC Water Fee Solution Example

- DC Water can use the Customer Service Information (CIS) system Vertex One/SAP (VI) to block all non-residential customers from processing credit card payments
- FY2019 breakdown of merchant card and ACH approximate transactions by customer class, according to CIS-VI data

FY2019	Approximate	Average Fee	DC Water Cost
Merchant Card	380,000	\$3.27	\$1.2 million
ACH	550,000	\$0.20	\$110,000
Current Process	FY2019	Average Cost	\$1.3 million

FY2020	Approximate	Average Fee	DC Water Cost
Merchant Card	370,000	\$2.00	\$740,000
ACH	600,000	\$0.20	\$120,000
Future Process	FY2020	Average Cost	\$860,000

Next Steps

💧 RFP for payment gateway services to include

- Lower merchant card (credit/debit) fee to a contractual fixed fee
 - Possibly \$2.00 or less
- Combine payment gateway services and merchant service

💧 Block all non-residential credit card processing options

- By blocking all non-residential credit card processing options, DC Water can maintain the utility rate
- Upgrade costs to customer information system (VI/SAP)

Overview

An Owner Controlled Insurance Program - OCIP is an alternative insurance program in which a project owner provides and maintains insurance coverages to protect the owner, design builders, prime contractors and subcontractors working on identified projects; OCIP's are typically used on large construction projects involving multiple contractors and subcontractors.

OCIPs provide an opportunity to achieve:

- Strengthened construction risk management, risk reduction, alternative insurance program
- Multiple interest coverage using master insurance policies
 - Allows for multiple insureds to be bundled (or wrapped up) into one combined and controlled program
- Mutually identified insurance coverage including higher limits
- Uniform insurance claims handling, loss prevention and safety
- Joint defense, limited cross-liability and coordinated post-loss management

A “Rolling” OCIP (ROCIP) covers a long-term capital improvement program or similar group of separate projects.

 - Lower overall insurance costs
 - Volume discounts on insurance purchases;
 - Reduced losses from effective, comprehensive, safety and loss control programs;
 - Lock in insurance rates over several years
- Targeted, superior, safety programs are included
 - Multiple layers of oversight are initiated
 - Contractor accountability is enhanced

Program Goals (*Continued*)

- Simplified insurance claims procedures
 - Reduced litigation since one insurance company defends all protected parties in a lawsuit
 - Increased ability to influence the claim handling and outcome
 - Reduction in delays that may result from sorting out multiple insurers and agendas

- Substantial reduction in the amount of time required for obtaining certificates of insurance from contractors

ACTION ITEM 6B: FY 2020 – FY 2029 Proposed Capital Improvement Program (10-Year Disbursement Plan and Lifetime Budget)

DC Water presents its capital improvement program on two different bases:

- a. **10-Year Disbursement Plan** – The cash disbursement-based capital plan is utilized to forecast the timing and amount of capital financing, which is the primary basis for projected retail rate increases. As shown in Attachment A-1, the Board of Directors will be asked to approve a 10-year disbursement plan of \$5.45 billion.
- b. **Lifetime Budget** – The project lifetime budget reflects the total costs of each project active during the 10-year planning period. These costs include historical and projected spending, project contingencies, and labor (listed as separate line item). As shown in Attachment A-1, the Board of Directors will be asked to approve a lifetime budget of \$12.39 billion.
