Fiscal Year 2021

Monthly Financial Report

Period Ending December 31, 2020

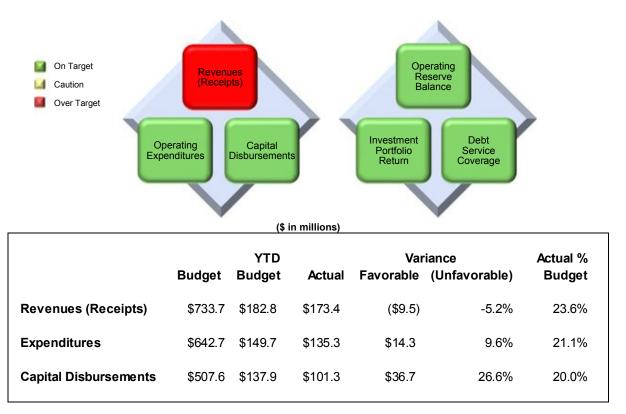

DEPARTMENT OF FINANCE

Matthew T. Brown, CFO & Executive Vice President, Finance and Procurement Ivan Boykin, Director, Finance Syed Khalil, Director, Rates & Revenue Genes Malasy, Controller Lola Oyeyemi, Director, Budget

DECEMBER 2020

EXECUTIVE SUMMARY

As of the end of the first quarter of FY 2021, with 25 percent of the fiscal year completed, we are on track with budgetary expectations and targeted performance metrics, with the exception of revenue receipts due to the decline in consumption resulting from the impact of the COVID-19 pandemic.

Highlights:

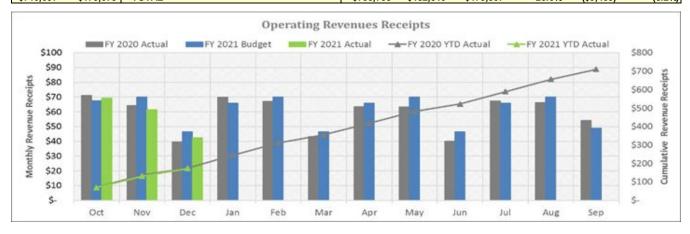

- Target reductions have been implemented to align expenses with the reduced revenue forecasts due to the COVID-19 pandemic
- FY 2022 Budget
 - Budget Workshop immediately following the Board meeting on February 4, 2021 and Budget adoption anticipated on April 1, 2021
 - Wholesale Customer briefing scheduled for February 12, 2021
- FY 2020 Year-End Closeout Status Update
 - Financial Statement audit was completed with unmodified "clean" opinion issued on December 18, 2020 and results will be presented to the Audit Committee on January 28, 2021
 - Development of Comprehensive Annual Financial Report (CAFR) is underway
 - The OMB Uniform Guidance Audit is on-going with expected completion by the end of January
 - Green Bond attestation engagement is underway
- Stakeholder Alliance discussion is scheduled for January 21, 2021

Matthew T. Brown, Executive Vice President & Chief Financial Officer

VARIANCE ANALYSIS FOR MAJOR REPORTED ITEMS

At the end of December 2020, cash receipts totaled \$173.4 million, or 23.6 percent of the FY 2021 budget. The total receipts for December were \$42.6 million as compared to the budgeted \$45.8 million. Several categories of customers make payments on a quarterly basis, including the Federal Government (which made their first quarterly payment in October), and wholesale customers (which made their first quarter payment in November).

Areas of Overcollection	Areas of Undercollection
<u>Federal</u> - Actual receipts through December 2020 total \$19.5 million or 25.2 percent of the budget. The Federal government made their first quarter payment in October 2020.	<u>Residential, Commercial and Multi-Family</u> – Receipts for this category are lower at \$96.8 million or 23.0 percent of the budget. The lower receipts are mainly due to decline in consumption in
<u>Wholesale</u> – The wholesale customers actual receipts through December 2020 total \$21.0 million or 25.7 percent of FY 2021 budget. The wholesale customers made their first quarter	Commercial category on account of the impact of COVID-19. The December 2020 receipts were lower by \$3.1 million or 8.9 percent as compared to the monthly budget.
payment in November 2020. <u>District Government</u> – Receipts are slightly higher at \$5.5 million or 30.0 percent of the budget. The December receipts are at \$3.0 million. The December 2020 receipts are higher by \$1.4 million	<u>PILOT/ROW</u> – The YTD receipts for PILOT/ROW are slightly lower at \$5.5 million or 24.7 percent of the budget. The December 2020 receipts are slightly lower by \$0.2 million as compared to the monthly budget.
primarily due to collection of \$1.15 million short-paid amount in November.	<u>Other Revenue</u> - Receipts are lower at \$7.9 million or 17.8 percent of the budget. The \$2.6 million lower receipts are primarily due to
<u>DC Housing</u> - Receipts are slightly higher at \$3.1 million or 25.7 percent of the budget. The December 2020 receipts are slightly higher by \$0.1 million as compared to the monthly budget.	(i) \$1.5 million lower receipts from System Availability Fee and (ii) \$1.0 million lower miscellaneous receipts. The December 2020 receipts were \$1.6 million lower than the monthly budget primarily due to lower receipts from System Availability Fee, Miscellaneous Fee and Developer Contractor Fee for Water and Sewer.

\$544,352	\$124,845	TOTAL NET OPERATING	\$618,281	\$144,330	\$129,489	20.9%	\$14,841	10.3%	

VARIANCE ANALYSIS FOR MAJOR REPORTED ITEMS

Total operating expenditures for this period (including debt service and the Right-of-Way & PILOT fees) totaled \$135.3 million or 21.1 percent of the FY 2021 Board-approved budget of \$642.7 million.

These numbers include estimated incurred but unpaid invoices and are subject to revision in subsequent months.

Areas of Underspending

<u>Personnel Services</u> – YTD underspending is due to deliberate pause in the hiring process with the exception of critical positions so as to achieve spending target reductions in response to the reduced revenue forecasts. Of the 1231 positions authorized, 1086 were filled at the end of December with a vacancy rate of 11 percent.

<u>Contractual Services</u> – Spending is in line with expectations at this time of the fiscal year and expected to remain lower than usual throughout the remainder of the fiscal year as expenses are curtailed to ensure that we are only allowing critical and COVID-related expenditures.

<u>Utilities</u> – Underspending is primarily due to lower than budgeted electricity prices. A total of 5MW of the Authority's electric load is locked at an average Western Hub price of \$27.67/MWh for the remainder of the fiscal year.

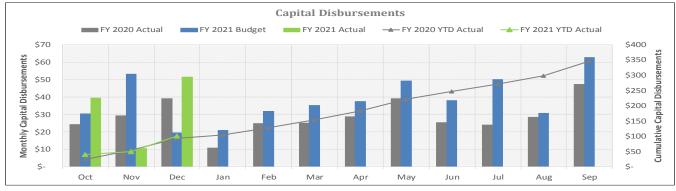

Small Equipment – Spending is consistent with purchases at this time of the fiscal year.

<u>Debt Service</u> – YTD spending excludes payment of \$2.2 million for the Build America Bonds Subsidy (BABS) which was accrued in FY 2020 and paid during this fiscal year.

VARIANCE ANALYSIS FOR MAJOR REPORTED ITEMS

At the end of December 2020, capital disbursements are \$101.3 million or 20 percent of the FY 2021 approved budget, which is subject to revision as part of the FY 2022 budget process.

The year-to-date underspending in various service areas reflects management's efforts to mitigate potential impacts of reduced revenue due to the coronavirus pandemic.

Project performance will be reviewed in detail as part of the quarterly CIP update by the Department of Engineering & Technical Services to the Environmental Quality & Operations and Finance & Budget Committees in February 2021.

Fiscal Year-to-Date As of December 31, 2020

Retail Accounts Receivable (Delinquent Accounts)

The following tables show retail accounts receivable over 90 days (from the billing date) including a breakdown by customer class.

Greater Than 90 Days by Month

	\$ in millions	# of accounts
September 30, 2012	\$5.5	13,063
September 30, 2013	\$4.9	11,920
September 30, 2014	\$5.3	12,442
September 30, 2015	\$6.5	11,981
September 30, 2016	\$7.7	12,406
September 30, 2017	\$8.4	11,526
September 30, 2018	\$13.4	16,273
September 30, 2019	\$10.6	8,744
September 30, 2020	\$17.9	13,775
October 31, 2020	\$18.9	14,276
November 30, 2020	\$19.8	14,772
December 31, 2020	\$22.7	15,605

Notes: The increase in the accounts receivable over 90 days (from the billing date) is due to the temporary suspension of collections procedures because of the new billing system VertexOne, which was implemented in December 2017. The increase in accounts receivable from March to December 2020 is primarily due to increased delinquencies and deferred payments due to the impact of COVID-19.

Greater Than 90 Days by Customer

Notes: Included in the above \$22.7 million (or 15,605 accounts) of the DC Water over 90 days delinquent accounts, \$4,216,396.09 (or 1,673 accounts) represents Impervious only accounts over 90 days delinquent.

- Reportable delinquencies do not include balances associated with a long standing dispute between DC Water and a large commercial customer.

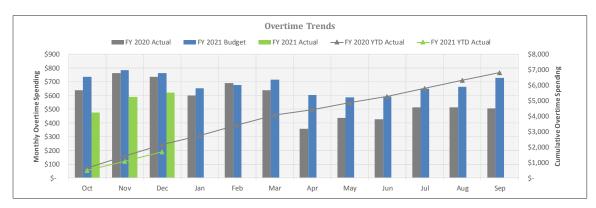

Fiscal Year-to-Date As of December 31, 2020

Accounts Payable Performance

Cumulative performance for the three-month period ending December FY 2021, a total of 3,219 vendor payments were processed and paid within 30 days compared to 5,265 in FY 2020 (as shown in the table) and with a dollar value of \$143.4 million compared to \$154.1 million for FY 2020.

For FY 2021, approximately 94% of the invoices were paid within 30 days compared to 96% for FY 2020. The Authority's goal is to pay 97% of all undisputed invoices within 30 days.

Fiscal Year-to-Date As of December 31, 2020

Grants Report

The Authority currently receives grants to fund portions of its capital project costs from the U.S. Environmental Protection Agency (EPA) and the Federal Emergency Management Agency (FEMA).

The EPA grants are issued under two acts, the Clean Water Act of 1972 and the Safe Drinking Water Act of 1974.

The FEMA mitigation grants are issued under the Robert T. Stafford Disaster Relief and Emergency Assistance Act through the Hazard Mitigation Grant Program (HMGP) Act of 1993 and the Pre-Disaster Mitigation Grant Program (PDM) Act of 2000.

As of December 31, 2020, DC Water has \$341.2 million in total federal funds for active projects, as indicated below:

The remaining balance of the EPA funding as of December 31, 2020 is \$34 million. FEMA grants have a balance of \$3.7 million as of December 31, 2020.

DC Water has received twenty-one separate Congressional CSO appropriations totaling \$268.8 million plus accrued interest of \$12.5 million, resulting in total CSO funding of \$281.3 million. The cumulative CSO appropriation life-to-date cash disbursement is \$281.3 million, based on requested reimbursements through December 31, 2020. The remaining CSO balance as of December 31, 2020 is \$803 which represents interest earned on CSO funds through the month of December 2020.

DC Water

Investment Performance Report – December 2020

DC Water Finance Division Economic Update

ECONOMIC COMMENTARY

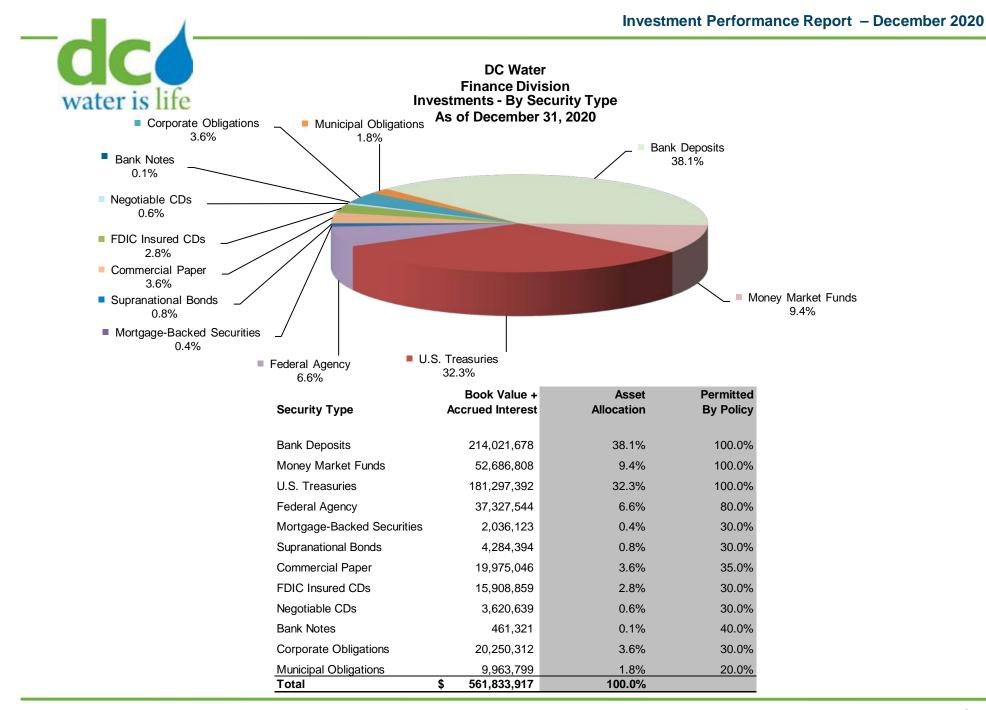

- Congressional law makers passed a fiscal stimulus package as market participants cheered on the long-waited deal. On December 27, 2020, President Trump signed into law the \$900 billion economic stimulus package and \$1.4 trillion in funding for the federal government through the FFY 2021 (September 30, 2021). The bill includes a one-year extension of permitted spending for coronavirus relief funds provided through the CARES Act, now scheduled to be provided through December 31, 2021. The relief package also included supplemental funding for education, healthcare, and transportation sectors.
- U.S. Gross Domestic Product ("GDP") expanded in-line with market expectations at an annual rate of 33.4% in the third quarter, according to the US Bureau of Economic Analysis' third estimate. The slight upward revision from the second estimate of 33.1% primarily reflected larger increases in personal consumption expenditures (PCE) and nonresidential fixed investment.
- Inflation remains subdued and shows little signs of acceleration. The core PCE price index, which includes food and energy, rose in-line with market projections with a reading of 1.6% in November compared to a year ago. Federal Open Market Committee policy makers continue to reiterate they do not anticipate inflation will pose a threat to the economy and have signaled that they plan to hold rates near zero through 2023.
- Nonfarm payrolls unexpectedly shed 140,000 jobs the month of December, representing the first time payrolls have dropped since the height of the pandemic last April. This decline is significantly different from the 50,000 addition expected for the month and is a stark decline following November's revised addition of 336,000 jobs. The Department of Labor stated that the decline in "payroll employment reflects the recent increase in coronavirus cases and efforts to contain the pandemic."

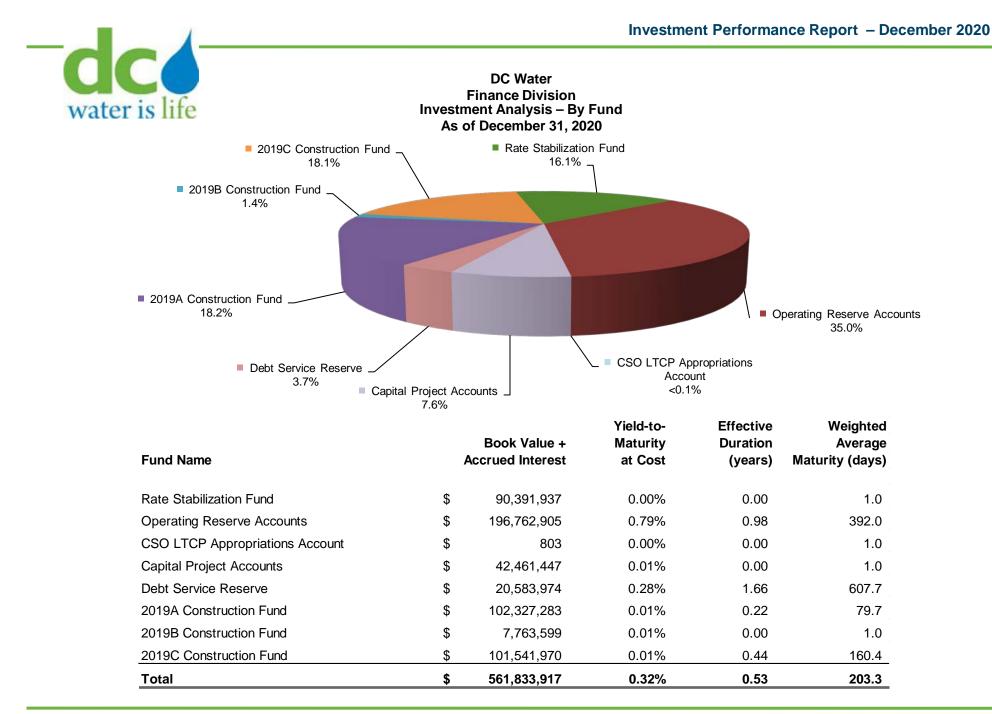

PORTFOLIO RECAP

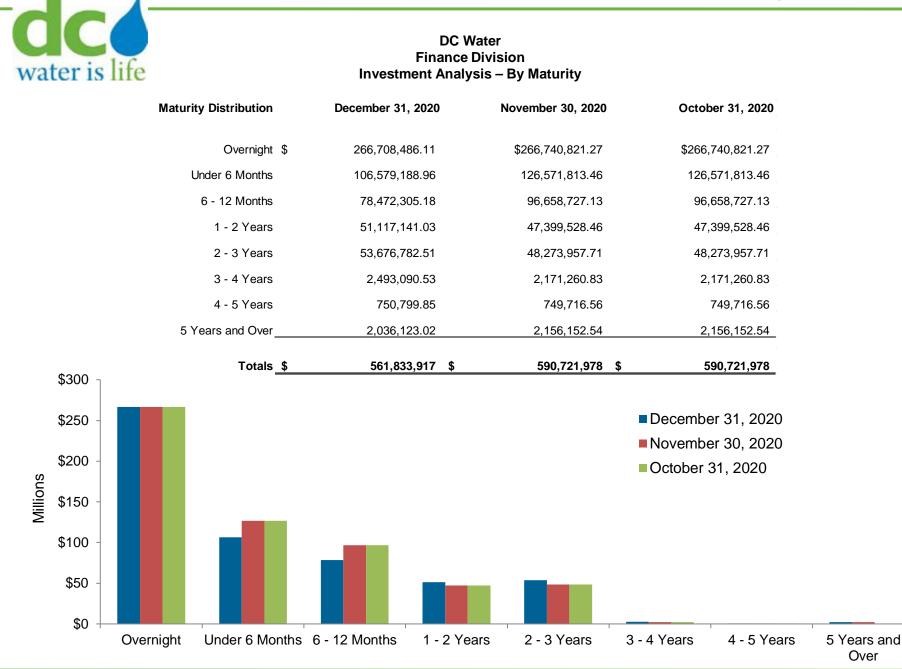

- The portfolio is diversified among Bank Deposits, U.S. Treasuries, Federal Agencies, Mortgage-Backed Securities, Commercial Paper, Supranational Bonds, Negotiable CDs, Corporate Notes/Bonds, Municipal Bonds, FDIC Insured CDs, Bank Notes and SEC registered money market funds.
- > The overall yield-to-maturity on cost of the portfolio is 0.32%.

Operating Reserve

- The investment advisor (PFM) purchased \$4.0 million in U.S. Treasury notes during the month of December.
- Attractive prices were also found for \$1.7 million of a Freddie Mac issue at the beginning of the month.
- PFM later purchased a combined \$1.4 million in corporate notes from various issuers.
- In addition, PFM was able to find value in New York State municipal bonds and purchased \$0.9 million of the issue mid-month.

Fed Reaffirms Commitment to Support the Economy

December ·

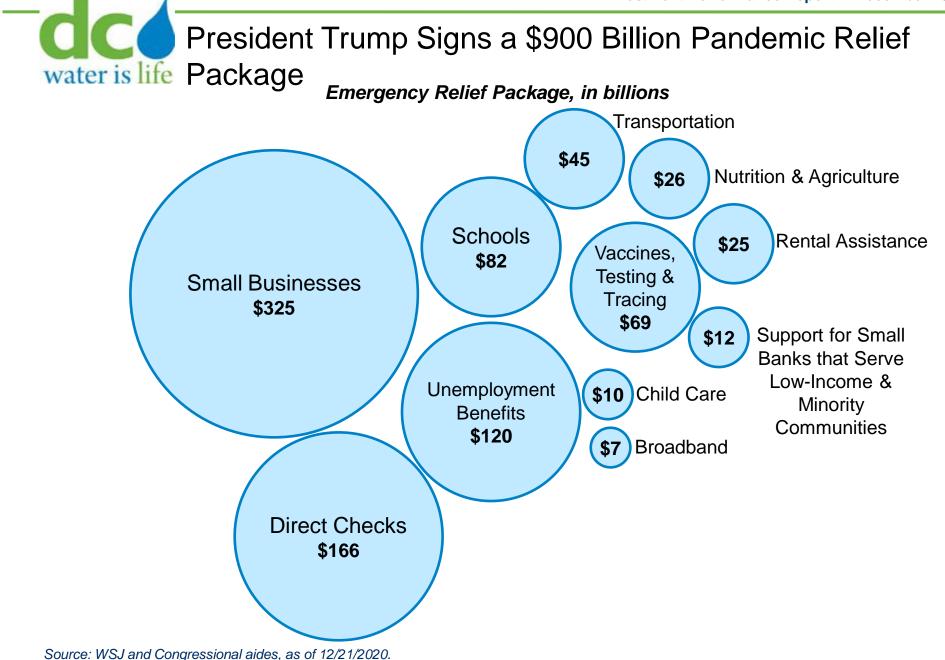

• Economic activity and employment have continued to recover but remain well below their levels at the beginning of the year... Overall financial conditions remain accommodative, in part reflecting policy measures to support the economy and the flow of credit to U.S. households and businesses.

• The path of the economy *will depend significantly on the course of the virus*. The ongoing public health crisis will continue to weigh on economic activity, employment, and inflation in the near term, and poses *considerable risks to the economic outlook* over the medium term.

- With inflation running persistently below this longer-run goal, the Committee will aim to achieve inflation moderately above 2 percent for some time so that inflation averages 2 percent over time and longer-term inflation expectations remain well anchored at 2 percent. *The Committee expects to maintain an accommodative stance of monetary policy until these outcomes are achieved.*
- In addition, the Federal Reserve will continue to increase its holdings of *Treasury securities by at least \$80* billion per month and of agency mortgage-backed securities by at least \$40 billion per month until substantial further progress has been made toward the Committee's maximum employment and price stability goals.

Overview of Operating Budget Drivers

ATTACHMENT 2

Finance and Budget Committee – January 28, 2021

District of Columbia Water and Sewer Authority

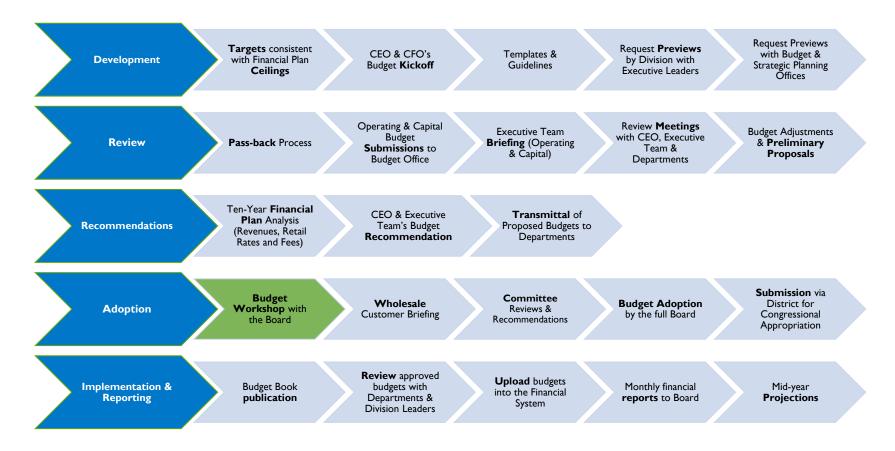

- Provide overview of the annual budget process
- Provide overview of curtailment measures in response to COVID-19 impacts
- Provide FY 2020 operating budget performance update
- Review FY 2021 forecasts, operating budget drivers and historical trends

Budget Process

DC Water COVID Response – FY 2020

- DC Water ensured the continuity of operations by prioritizing the safety of employees, maintaining operational facilities, and providing vital services to our customers during the COVID pandemic
- FY 2020 departmental spending plans were developed to reduce \$20 million from the approved operating budget by pausing some hiring and delaying non-critical purchases and activities
 - Deferred proactive inspections, repairs and maintenance on equipment
 - Reduced hours for professional services e.g. field controllers, calibration & instrumentation, low voltage, automotive maintenance, internal audit etc.
 - Reduced various services based on lower than anticipated costs for litigation, claims, biosolids hauling, software
 maintenance and claims, with risks being monitored
 - Reduced purchase of office supplies, custodial supplies, promotional items and specialized equipment
 - Suspended DC Water sponsored events, travels, training and conferences due to COVID-19 pandemic
 - Proceeded with hiring efforts for critical positions only, and curtailed overtime
- DC Water achieved the \$20 million target reductions and additional underspending from other areas due to favorable prices for chemicals and electricity, and lower water purchases due to decline in consumption

DC Water COVID Response – FY 2021

- Decline in water consumption is expected to continue in FY 2021 with reduced level of cash receipts and revenue forecasts
- Management will continue to monitor revenue, adjust (either upward or downward) expenditure forecasts and apprise the Committee as part of the annual budget development and mid-year budget review processes

Baseline Forecasts

Carry-forward of FY 2020 target reductions

Spending Controls

Funds reserved to achieve departmental spending plans

Exceptions

Pre-approvals required for emergencies and high priority programs

Contingency Plans

Additional actions to adjust targets and align with revenue forecasts

\$ in thousands

FY 2020 Operating Budget Performance

- DC Water ended the fiscal year 2020 with strong financial results and a "clean" audit opinion
 - Operations and Maintenance (O&M) \$29.0 million below budget mainly from personnel (pause in hiring, lower benefits and reduced overtime), fixed costs (favorable prices from chemicals and utilities), water purchases and contractual services (spending reductions to achieve targets)
 - Debt Service \$8.2 million below budget consistent with the FY 2021 adopted financial plan and includes the refunding of the 2013 Series A bonds
 - Cash Financed Capital Improvement (CFCI) With favorable O&M position, these funds were fully utilized for pay-go financing

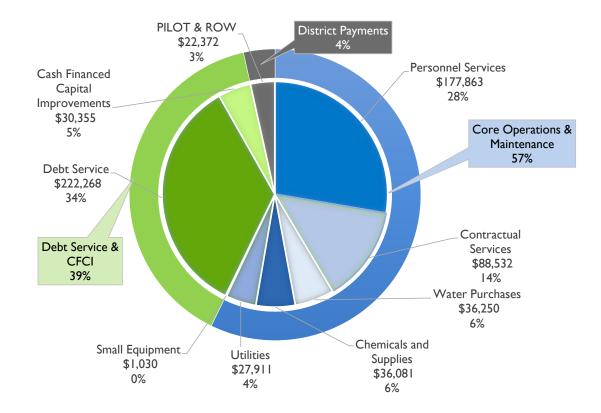

FY 2020 Budget vs. Actual Operating Expenditures

Approved FY 2021 Operating Budget

\$ in thousands

- DC Water's operating budget includes the operations & maintenance (O&M), debt service & Pay-Go and District payments ۵.
- Spending forecasts are \$20 million below the Board-approved budget due to reduced revenues forecast

\$ in thousands

Operating Budget Trends

- Core Operations & maintenance (O&M) costs for personnel and non-personnel services have been consistently stable with average growth of 3% 4% per year
- Debt service continues to be the largest driver of the operating budget, at 35% of the overall FY 2020 expenditures and 36% of the FY 2021 forecast

Annual Operating Expenditures

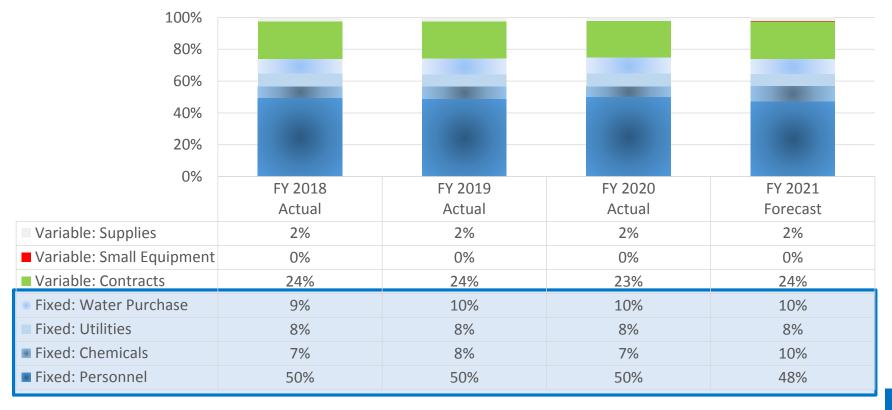

Fixed and Variable Cost Drivers

- Fixed costs are considered non discretionary in nature and mainly for unavoidable and uncontrollable services such as
 - Union agreement salaries and benefits for approx. 67% of DC Water's workforce
 - Market Driven Chemicals and energy costs
 - Purchase of water from the Aqueduct
 - Debt service and fees required for capital investments
- Variable costs are based on operational business needs, strategic priorities and other discretionary items such as
 - Overtime used for emergency repairs
 - Contractual services for operations and maintenance of equipment, vehicles, buildings; software maintenance, employee training, etc.
 - Small tools and equipment

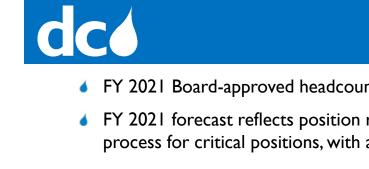

O&M: Fixed and Variable Costs

• Approximately 75% of core operations and maintenance (O&M) costs is fixed, including personnel costs

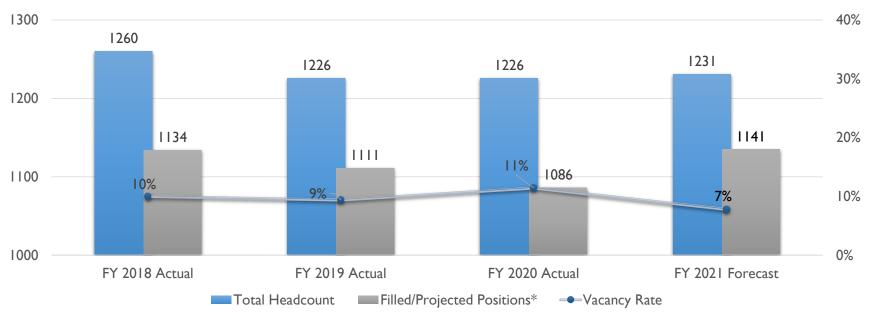

BREAKDOWN OF FIXED AND VARIABLE COSTS

Personnel - Headcount

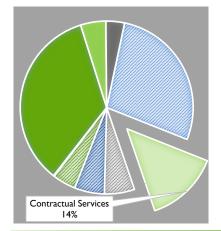

- FY 2021 Board-approved headcount of 1231 includes the five new positions
- FY 2021 forecast reflects position reclassifications to date, current recruitment efforts and anticipated hiring process for critical positions, with an overall vacancy rate of 7% compared to historical average of 10%

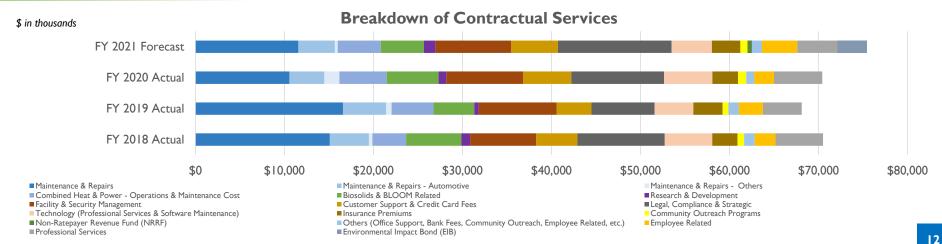

Historical & Projected Headcount

* The projected positions for the FY 2021 forecast excludes unfunded vacancies

Contractual Services

- Approximately 62 percent of the contractual services budget is for infrastructure maintenance, legal and compliance requirements
- FY 2020 expenditures were lower than prior years due actions taken in response to the COVID impacts such as deferred proactive inspections, repairs and maintenance on equipment and reduced hours for professional services e.g. field controllers, calibration & instrumentation, and low voltage services
- FY 2021 forecast reflects continued focus on spending reductions to align with reduced revenue forecasts and funding requirements to cover new, high priority and compliance programs

\$ in thousands

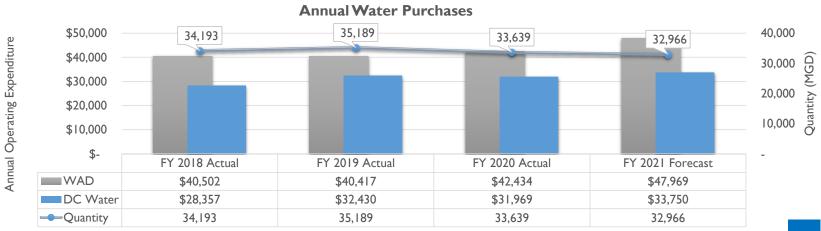

Water Purchases 6%

4

DC Water purchases water from the Washington Aqueduct (WAD)

- Responsible for approximately 75% of the Aqueduct's operating costs based on proportionate share of water sold
- Annual water rates are set based on the approved budget, including historical budget performance and consumption trends
- Water purchases reduced by 4.8% or 1,550 MGD during the last 6 months of FY 2020 due to the COVID pandemic, with an overall decline of 4.4% for the year

• FY 2021 forecast assumes continued decline in water demand

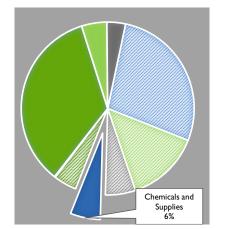

Water Purchases

\$ in thousands

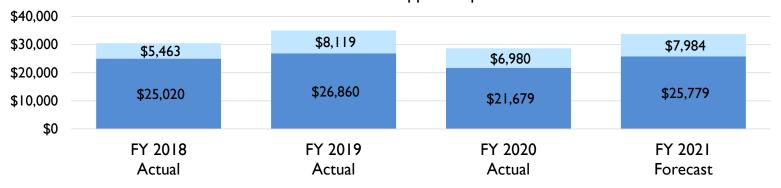

Chemicals & Supplies

14

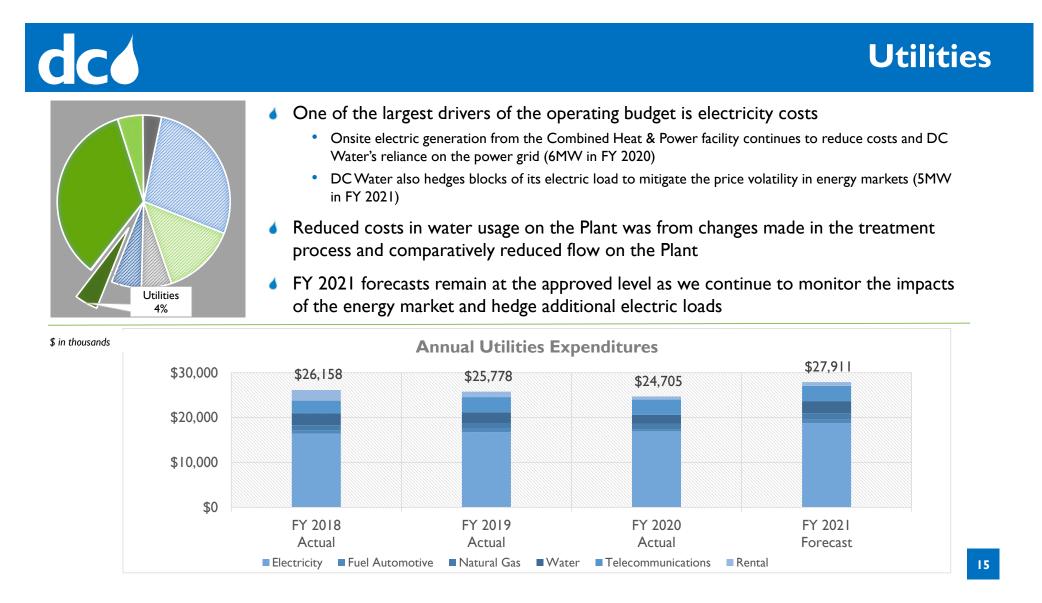

6

- Chemicals are used in the treatment processes at the Plant and various pumping facilities
 - Impacts include market volatilities of major chemicals (methanol, sodium bisulfite and ferric chlorite), utilization in the Tunnel Dewatering Pump Station (TDPS), and concentration of the influent
 - The lower expenditure in FY 2020 was mainly due to lower prices for major chemicals and reduced load based on less tourists visiting the District during the pandemic
 - FY 2021 forecast assumes slight increases in the unit prices of some chemicals (e.g. methanol increased from \$0.1528 per pound in October 2020 to \$0.2088 per pound in December 2020)
- Supplies include the purchases of parts for water lines, mains and pumping station repairs; and pays for the uniforms and shoes for our working crews as required by the union agreement

58

Annual Chemicals & Supplies Expenditures

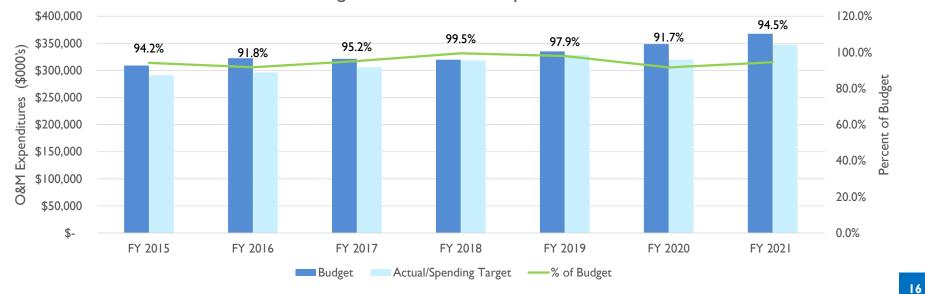

Historical Budget Performance

\$ in thousands

- DC Water is committed to tightening its budget in an effort to reduce significant budget surpluses and better align with historical cost trends
- DC Water maintains strong financial management and continues to prioritize and fund new programs to improve operational efficiencies within overall Board-approved budgets

Budget vs. Actual O&M Expenditures

Budget Risks and Mitigation Strategy

- As with any operational business and DC Water's budgets developed almost two years in advance of the fiscal year, inherent risks include -
 - Crude oil and energy market volatilities (energy and chemicals)
 - New requirements (regulatory, technology, tunnels and operational facilities)
 - Aging infrastructure (repairs, overtime for water main breaks and sewer backups)
 - Litigations for unanticipated large legal cases
 - Claims and insurance premiums
 - Increase in employee medical benefits based on industry trends and regulations
- Mitigation Strategy
 - Monthly reviews with departments to gain insight into budget pressures
 - Mid-year projections and periodic forecasts for monitoring spending
 - Implement strategic spending restrictions and redirect funds to prioritized needs
 - Cash Financed Capital Improvement Fund is also available as contingency for emergencies, with unutilized funds transferred to pay-go at the end of the year

- Deliver the proposed FY 2022 budgets in February 2021
 - Revenue Cost recovery within approved rate proposals
 - Expenditure Funds operating budget priorities consistent with the financial plan goals
 - Capital Program Address system infrastructure priorities
- Conduct reviews and recommendations with the various Board Committees and Wholesale Customer in February and March 2021
- Budget Adoption in April 2021

ATTACHMENT 3

<u>Completed:</u> Rock Creek GI Practicability Assessment Per Consent Decree

- Board approved approach in June 2020
- Approved by EPA 11/23/20
- ✓ Non-material Consent Decree Modification filed in Federal Court on 12/22/20
- Provides for <u>hybrid approach</u>:

Background Environmental Impact Bond

- DC Water issued EIB with a principal of \$25M
 - Purchasers of the bond are Goldman Sachs Urban Investment Group (GSUIG) Real Estate Member LLC and Calvert Social Investment Foundation Inc.
 - EIB is "Public Utility Subordinate Lien Multimodal Revenue Bonds Series 2016B"
- Financed first GI Project in Rock Creek (RC-A)
 - Modeled after "Pay for Success" Social Impact Bonds
 - Investors repaid based upon the effectiveness of GI in managing the volume of stormwater runoff
 - Greater volume managed will result in a larger repayment to investors
 - Lower volume managed will result in a smaller repayment to investors
- GI has never been constructed on a large scale in the District, so the EIB served as a hedge for the effectiveness of GI in managing stormwater

2016 Preconstruction Predictions **Monitoring and Modeling**

- Documented in
 - "Environmental Impact Bond Technical Evaluation Memorandum, dated September 13, 2016"
 - Included in Exhibit D of the Private Placement Agreement
- Flow and rainfall monitoring & modeling to predict performance of GI
- Pre-construction monitoring period:
 - March 1, 2016 June 2, 2016, used for EIB calibration

2016 Preconstruction Predictions Sensitivity Analysis Results

- Best- and worst-case scenarios evaluated using range of GI performance parameters
- Performed Monte Carlo analysis with 1000 simulations

Percentile	Percent Reduction	Range	
Adjusted 95 th Percentile	41.3%	23%	
Adjusted 5 th Percentile	18.6%		

EIB Outcome Range

Tier	Runoff Reduction	Payments	
1	Greater than 41.3%	DC Water pays Outcome Payment of \$3,300,319.00 to	
		Purchasers	
2	18.6% to 41.3%	No Outcome Payment or Risk Share Payment	
3	Less than 18.6%	Purchasers pay Risk Share Payment of \$3,300,319.00 to DC	
		Water	

RC-A Construction Examples of Constructed Facilities

109 facilities in metered area managing more than 19 impervious acres

RC-A Construction Retrofits Made During Post-construction Monitoring

- Underdrain Gate
 - <u>Observation</u>: Excessive leaking around seal on flapper-style gates resulted in GI practices releasing flows at a higher rate than design draw downtime of 48 hours
 - <u>Retrofit</u>: Flow Restriction Device (FRD) flapper gates were replaced with either a mechanical plug or a straight fit gate
 - <u>Result</u>: Improved the stormwater capture
- Alleys
 - <u>Observation</u>: During high intensity storms, flow by-pass occurred for Alley Permeable Pavement facilities (APP), while facility has storage
 - <u>Retrofit</u>: FRD access solid cast iron lid covers were replaced with slotted cast iron grate covers, and a stainless-steel filter basket inserted into the riser pipe to protect the facility from sedimentation and debris.
 - <u>Result</u>: Increased the volume of water reaching the aggregate storage, similar to the Enhanced Infiltration Risers (EIRs) in the bioretention practices,
- Retrofits were implemented between November 1, 2019 and January 31, 2020.

FRD – Mechanical Plug

FRD - Straight Fit Gate

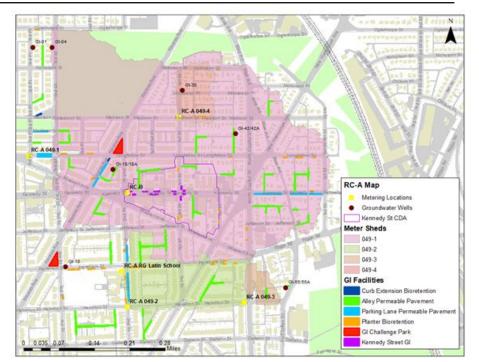

RC-A Construction **Maintenance**

- Facilities were properly maintained throughout monitoring period
 - Preventative maintenance
 - Corrective maintenance

Facility Type	Frequency	Maintenance Activities	
Curb Extension Bioretention (CBR) & Planter Bioretention (PBR)	Monthly	Trash, weed, leaves, debris, and dead plant removal. Inspect for erosion. Check for missing signs. Remove sediment. Inspect cleanout, underdrains, and dry well grate inlets and note any standing water.	
	Quarterly	Inspection of system for hydraulic function, mitigation of clogging. Replace gravel or river rock in eroded areas.	
	Annually	Trim grasses and perennials, prune shrubs.	
Alley Permeable Pavement (APP) & Parking Lane Permeable Pavement (PPP)	Monthly	Vacuum sweep and remove debris from enhanced infiltration baskets. Inspection and removal of trash, leaves, sediment, and weeds.	
	Quarterly	Inspect structures for blockages and sediment and inspection and correction of settlement or heaving.	
	Annually	Inspect the surface and underdrain system by flushing to verify flow and exfiltration. Repair any damaged or displaced pavers.	

Post-Construction Assessment Post-Construction Monitoring

- Sewershed, rainfall & groundwater 19 months (Mar 1, 2019 – Sep 30, 2020)
 - Sewershed and rainfall monitoring locations unchanged for Pre- and Post- monitoring periods
 - Three groundwater monitoring wells (RCAGI-18, RCAGI-42, and RCAGI-55) were relocated in the immediate vicinity as they were sited within the footprint of the GI facilities constructed
- GI practice level monitoring
 - More than 70 GI practices monitored for 6.5 months (Mar 12, 2020 – Sep 30, 2020)
 - Representative practices monitored for 17.5 months (Apr 19, 2019 – Sep 30, 2020

Post-Construction Assessment Summary of Monitoring Observations

- Sewer meters cannot be used to fairly compare pre- and postconstruction
 - Increase wet weather response in 2019/2020 compared to 2016, based on:
 - Extreme rainfall data
 - RC-A metering data
 - DOEE control shed data
 - Anacostia River Tunnel response data
 - Increase in peak flow rate for large storms after 2019/2020
 - Possible change in flow bypassing
 - Also reflective of increase wet weather response
- As a result, DC Water assessed performance using the GI practice monitoring. It's practical to calibrate filling/ emptying of GI practices to observed data and then use this to calculate reduction in wet weather volume.

Use of sewer meters is not a technically sound method of calculating performance given weather conditions & data set

GI practice level data more representative of actual conditions

Post-Construction Assessment **Results**

Average Year Rainfall Conditions (1988, 1989, 1990)

	Wet Weather Volume (mg)		% reduction normalized		
Sewershed	Pre-Construction	Post-Construction	to Impervious Acres Treated (%)		
Using Sewershed Meters	26.66	24.78	8.10%	4	Not representative given weather conditions and data set
Using GI Practice Meters	26.66	22.12	19.56%	•	Technically sound

Findings

- Calculating wet weather reduction using the water levels in the GI practices is a more technically sound and representative approach. It is our recommended approach for assessing performance.
- Predicted runoff reduction is estimated at 19.56%, which falls within Tier 2 outcome range established in the EIB

Tier	Runoff Reduction	Payments		
1	Greater than 41.3%	DC Water pays Outcome Payment of \$3,300,319.00 to Purchasers		
2	18.6% to 41.3%	No Outcome Payment or Risk Share Payment		
3	Less than 18.6%	Purchasers pay Risk Share Payment of \$3,300,319.00 to DC Water		

Lessons Learned – Adaptive Management

- Improve valves/orifices at underdrain outlets
- Select monitoring sites to reduce stormwater flow bypassing inlets and exiting the monitored shed
- Place practices in series to promote sediment removal
- Monitor at site-level instead of at sewershed level to measure performance

15

All facilities

Lessons Learned – Adaptive Management

- Maximize the space between the pavers to reduce clogging.
- Install sediment traps upstream of alley to remove sediment and distribute clean flow

Porous Pavement

- Flatten the "V" shape in the alley center to increase surface area for infiltration
- Provide maintenance access to access underdrain & orifice
- Reduce number of checkdams

Lessons Learned – Adaptive Management

Pursue open space facilities that allow for more economical construction
Install bioretention facilities closer to intersections instead of midblock to limit parking impacts
Construct high slope or long gutter inlets to reduce flow bypassing along the gutter

Knowledge gained was extremely beneficial:

- Incorporated into first Potomac GI Project (PR-A)
- Will be applied to subsequent GI projects
- Lessons learned will be shared with industry partners
 - Can benefit District's stormwater programs 2/3 of land area in District

17

.

•

Finance and Budget Committee - 5. Environmental Impact Bond Update (Attachment 3)- Carlton Ray

Post-Construction Assessment Extreme Rainfall Data

- Post-construction period observed large, intense rain events compared to preconstruction period
- Number of events with peak intensity > 2"/hr is four times greater in post-construction period

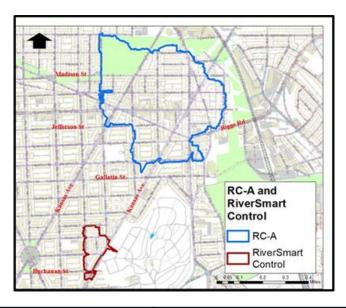

Sewershed	RC-A			
Monitoring Period	1/1/2016-1/1/2017 (Pre-Construction)	3/1/2019-9/30/2020 (Post-Construction)		
Duration (months)	12	19		
No. of Events	70	118		
Total Rainfall (inches)	34.5	70.28		
Avg rainfall/mo	2.8"/month	3.7"/month		
Events < 0.25"	3.76" (25 events)	5.88" (36 events)		
Events between 0.25" - 0.5"	7.8" (23 events)	12.34" (34 events)		
Events between 0.5" - 1.0"	19.82" (14 events)	17.31" (27 events)		
Events between 1.0" - 1.5"	3.4" (3 events)	12.19" (11 events)		
Events between 1.5" - 2.0"	5.57" (3 events)	8.38" (5 events)		
Events > 2.0"	4.15" (2 events)	14.18" (5 events)		
Max intensity between 1.0"/hr – 2.0"/hr	7 events	20 events		
Max intensity > 2.0"/hr	7 events	28 events		

Post-Construction Assessment DOEE Control Shed Data

- Control shed from DOEE's Riversmart LID Program.
- Located in the Piney Branch sewershed about 2,400 feet southwest of the RC-A shed
- Control shed is unchanged for the period evaluated
- Increased wet weather volume from 2015/2016 to 2019/2020 for all rainfall event sizes.

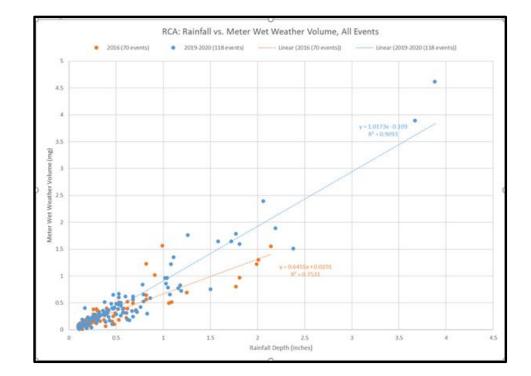

Sewershed	DOEE RiverSmart - Control		
Monitoring Period	6/1/2015 - 5/31/2016	6/1/2019 - 6/30/2020	
No. of Events	20	64	
Total Rainfall (inches)	6.55	29.81	
Events < 0.25"	1.63" (1 event)	4.6" (27 events)	
Events between 0.25" - 0.5"	1.58" (4 events)	5.63" (16 events)	
Events between 0.5" - 1.0"	2.32" (4 events)	9.24" (14 events)	
Events between 1.0" - 1.5"	1.02" (1 event)	4.83" (4 events)	
Events between 1.5" - 2.0"	0" (0 events)	3.19" (2 events)	
Events > 2.0"	0" (0 events)	2.32" (1 event)	
Max intensity between 1.0"/hr – 2.0"/hr	1	6	
Min max intensity > 2.0"/hr	0	7	
MG WWF per inch of rain (all events)	0.12	0.15	
MG WWF per inch of rain (events < 1")	0.12	0.14	
MG WWF per inch of rain (events \geq 1")	0.09	0.17	

Post-Construction Assessment RC-A Metering Data

- Increased wet weather volumes, for all events.
- Events less than 1":
 - Decreased from 0.75 mg/inch pre to 0.73 mg/inch post
 - GI practices are having an impact, even during an overall wetter period
- Events greater than 1":
 - Increased from 0.58 mg/inch pre to 0.94 mg/inch post
 - Flow bypassing may be reduced by GI

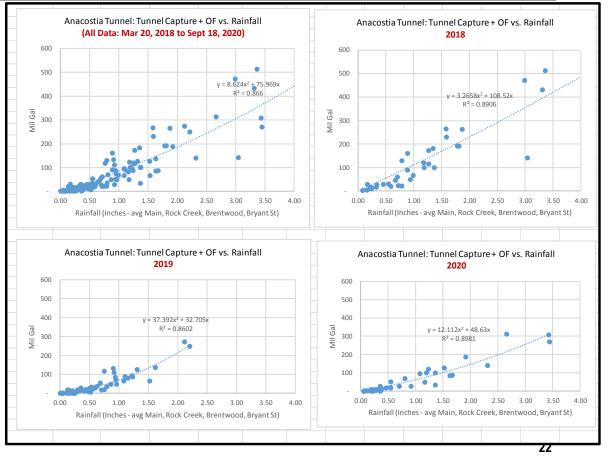

Sewershed	RC-A		
Monitoring Period	1/1/2016-1/1/2017 (Pre-Construction)	3/1/2019-9/30/2020 (Post-Construction)	
No. of Events	70	118	
Total Rainfall (inches)	34.5	70.28	
MG WW volume per inch of rain (all events)	0.69	0.83	
MG WW volume per inch of rain (events < 1")	0.75	0.73	
MG WW volume per inch of rain (events >= 1")	0.58	0.94	

Post Construction Assessment Anacostia River Tunnel Response Data

- Tunnel capture (mg/inch of rain) varies depending on rainfall period chosen
- Selection of different model calibration periods for pre- and post-construction monitoring can yield different results based on relative difference in rainfall conditions during that period
- Indicates importance of model calibration period on its applicability to the future predictions.

Parameter	Rainfall (in/yr)	Total Capture, Q (MG) for Rain Events (0.5" thru 2.0")			
Rainfall		0.5″	0.75″	1.0″	2.0″
2018-2020	47	40	62	85	186
2018	62	55	83	112	230
2019	42	26	46	70	215
2020	52	27	43	61	146
