What’s next?

Achieving success with green infrastructure will require the cooperation of many agencies, environmental groups and the public. It will require converting impervious surfaces on a range of properties with a range of owners. And the parties to the consent decree must agree on a new schedule.

Please help DC Water succeed in making the District a greener place. To find out how, turn this page.
DC Water needs your help.

This approach requires time. We need to study whether large-scale green development can bring major results.

The EPA and other parties to our consent decree must agree to new deadlines soon. So they need to hear from you.
