

INCREASED WATER PRESSURES ARE ON THE WAY...

DISTRICT OF COLUMBIA WATER AND SEWER AUTHORITY

dc 
water is life®

DC Water's project to upgrade the Fort Reno Pump Station is nearing completion and your water pressure will increase soon. The benefits of the pressure increase include improved fire flows and more efficient use of water. For example, you will be able to take stronger showers in less time.

And as a reminder, if you experience a water emergency, please call DC Water at (202) 612-3400 24-hours a day.
