

Lead and Copper Compliance Report January through June 2026

Table 1 summarizes the District of Columbia Water and Sewer Authority's (DC Water) Lead and Copper compliance sampling results for the monitoring period January through June 2026.

Table 1. Lead and Copper Summary Data

Number of Samples	
Lead and Copper	105
90th Percentile First Draw Concentrations	
Lead mg/L	0.002
Copper mg/L	0.089
Service Line Materials	
Full Lead	97
Partial Lead	8

Notes:

- 1) All addresses met Tier 1 criteria under 40 CFR 141.86(a)(4)(i) as single family structures that are served by a lead service line based on DC Water's customer information and service line inventory records at the date of sample collection.
- 2) Service line material listings are representative of the pipe material known at the time the sample was collected.
- 3) Results expressed as "0" may have been reported by the laboratory as less than 0.0002 mg/L or non-detect.

Notes:

- 1) All addresses met Tier 1 criteria under 40 CFR 141.86(a)(4)(i) as single family structures that are served by a lead service line based on DC Water's customer information and service line inventory records on the date of sample collection.
- 2) Service line material listings are representative of the pipe material known at the time the sample was collected.

Appendix B: Additional Monitoring Data

Tables B.1 and B.2 present results from the second draw samples collected during the period of the Lead and Copper Rule compliance sampling. Additional monitoring data presented in Attachment 2 to this report contains sample data collected from other DC Water programs that focused on lead, copper, or other metals that included lead sample results. A description of the program followed by the data set is included in Attachment 2.

Hi Maureen,

My staff reviewed the June 17, 2026 request submitted by DC Water to invalidate lead and copper results from 119 Tennessee Ave NE, collected during the January to June 2026 Lead and Copper (LCR) monitoring period. After processing the samples, DC Water recognized that on October 23, 2025, DC Water excavated the service line at 119 Tennessee Ave NE and found that the private side was copper pipe. As part of a water main replacement project on Tennessee Ave NE on January 9, 2026, DC Water replaced the public side service line and also observed copper on the public side at this address. Based on these findings, the sample collected on April 1, 2026, was collected from a residence without a lead service line and the site did not meet Tier 1 criteria.

As stipulated in 40 CFR 141.86(f)(1)(ii)(July 1, 2020), the primacy agency may invalidate a sample if it determines that the sample was taken from a site that did not meet the site selection criteria. Therefore, as the sample collected from 119 Tennessee Ave NE was from a site that does not meet Tier 1 criteria for having a lead service line, EPA approves the request to invalidate this sample. DC Water shall not include this site's results in its 90th percentile lead and copper level calculations for the January to June 2026 LCR compliance monitoring period. In addition, this site should be removed from DC Water's LCR sampling plan.

As DC Water continues service line excavations, replacements, and sampling from sites in its approved LCR sampling plan, EPA recommends that DC Water promptly review excavation and replacement reports and chain-of-custody forms to confirm that each site still meets Tier 1 criteria and that samples were collected and received as instructed before laboratory analysis.

Based on DC Water's approved 2026 LCR plan, the loss of the April 2026 lead and copper sample does not appear to impact the minimum number of required sample sites per 40 CFR §141.86(c) (July 1, 2020); please notify our office if this is incorrect. If you have any questions, feel free to reach out to me or EPA Region 3 Drinking Water and Source Water Protection Branch Chief Karrie Crumlish at crumlish.karen@epa.gov. Thank you for your partnership and coordination regarding this matter.

Sincerely,

Gregory Voigt
